Statistical Methods for the Evaluation of University Systems

"Thought provoking and fresh - this book challenges how we think about economics." Gillian Tett, Financial Times
For further information about recent publicity events and media coverage for Rethinking Capitalism please visit <http://marianamazucato.com/rethinking-capitalism/>
Western capitalism is in crisis. For decades investment has been falling, living standards have stagnated or declined, and inequality has risen dramatically. Economic policy has neither reformed the financial system nor restored stable growth. Climate change meanwhile poses increasing risks to future prosperity. In this book some of the world's leading economists propose new ways of thinking about capitalism. In clear and compelling prose, each chapter shows how today's deep economic problems reflect the inadequacies of orthodox economic theory and the failure of policies informed by it. The chapters examine a range of contemporary economic issues, including fiscal and monetary policy, financial markets and business behaviour, inequality and privatisation, and innovation and environmental change. The authors set out alternative economic approaches which better explain how capitalism works, why it often doesn't, and how it can be made more innovative, inclusive and sustainable. Outlining a series of far-reaching policy reforms, Rethinking Capitalism offers a powerful challenge to mainstream economic debate, and new ideas to transform it.

Informazioni sindacali

Valuing Banks

Named one of the best books of 2013 by the 'Financial Times', 'Huffington Post' and 'Forbes', this debate-shifting book debunks the myth of the State as a static bureaucratic organization only needed to 'fix' market failures, leaving dynamic entrepreneurship and innovation to the private sector. Case studies ranging from the innovations that make the iPhone so 'smart' to the current developments in clean technology reveal the reality, whereby the private sector only invests after the entrepreneurial State has made the bold, high-risk investments.

Il Sole-24 [i.e. Ventiquattro] ore, Milan

Over the past decade, China's growth model has become more reliant on investment and its footprint in global imports has widened substantially. Several economies within China's supply chain are increasingly exposed to its investment-led growth and face growing risks from a deceleration in investment in China. This note quantifies potential global spillovers from an investment slowdown in China. It finds that a one percentage point slowdown in investment in China is associated with a reduction of global growth of just under one-tenth of a percentage point. The impact is about five times larger than in 2002. Regional supply chain economies and commodity exporters with relatively less diversified economies are most vulnerable to an investment slowdown in China. The spillover effects also register strongly across a range of macroeconomic, trade, and financial variables among G20 trading partners.

Repertorio generale annuale di giurisprudenza

This book aims to overcome the limitations the variations in bank-specifics impose by providing a bank-specific valuation theoretical framework and a new asset-side model. The book includes also a constructive comparison of equity and asset side methods. The authors present a novel framework entitled, the "Asset Mark-down Model". This method incorporates an Adjusted Present Value model, which allows practitioners to identify the main value creation sources of a particular bank: from asset-based cash flow and the mark-down on deposits, to tax benefits on bearing liabilities. Through the implementation of this framework, the authors offer a more accurate and more specific approach to valuing banks.

Douglas uncovers the underlying reasons for lack of consistency and helps traders overcome the ingrained mental habits that cost them money. He takes on the myths of the market and exposes them one by one teaching traders to look beyond random outcomes, to understand the true realities of risk, and to be comfortable with the "probabilities" of market movement that governs all market speculation.

The Great Recession and the Distribution of Household Income

Crisi e scandali bancari nella storia d'Italia

The so-called Great Recession that followed the global financial crisis at the end of 2007 was the largest economic downturn since the 1930s for most rich countries. To what extent were household incomes affected by this event, and how did the effects differ across countries? This is the first cross-national study of the impact of the Great Recession on the distribution of household incomes. Looking at real income levels, poverty rates, and income inequality, it focusses on the period 2007-9, but also considers longer-term impacts. Three vital contributions are made. First, the book reviews lessons from the past about the relationships between macroeconomic change and the household income distribution. Second, it considers the experience of 21 rich OECD member countries drawing on a mixture of national accounts, and labour force and household survey data. Third, the book presents case-study evidence for six countries: Germany, Ireland, Italy, Sweden, the UK, and the USA. The book shows that, between 2007 and 2009, government support through the tax and benefit system provided a cushion against the downturn, and household income distributions did not change much. But, after 2009, there is likely to be much greater change in incomes as a result of the fiscal consolidation measures that are being put into place to address the structural deficits accompanying the recession. The book's main policy lesson is that stabilisation of the household income distribution in the face of macroeconomic turbulence is an achievable policy goal, at least in the short-term.

Il signore degli Agnelli

The Entrepreneurial State

Trading in the Zone

Un libro che rievoca mito e immagine di Giovanni Agnelli, nel contesto della storia sociale e di costume di questi anni. Signore ed emblema del capitalismo italiano negli ultimi decenni del XX secolo, l'erede della Fiat ne è stato il presidente e capo carismatico fino alla sua morte. Uscito di scena, anche l'impero automobilistico sembra avere imboccato il viale del tramonto. Agnelli è stato soprattutto il simbolo neodannunziano di un moderno modo di vivere inimitabile, il monarca democratico, il petroniano arbitro di tutte le eleganze, ovunque lasciasse traccia di sé e di un'aura sapientemente coltivata, consigli d'amministrazione, stadi di calcio, dorate alcove. Questo saggio racconta, con ricca documentazione di cultura industriale, la saga di un patriarca e di una famiglia dalle grandi fortune e sventure. Intorno e dopo di lui un'Italia di scandali bancari e truffe planetarie. Se il Don Giovanni della Fiat è stato il volto estetico e regale del capitalismo, il berlusconismo, con la corte dei suoi imitatori, si è imposto come nuova forma del padronato plebeo.

This book presents a collection of statistical methods and procedures to assess data coming from educational systems. The topics examined include: statistical methods for constructing composite indicators, applied measurements, assessment of educational systems, measurement of the performance of the students at Italian universities, and statistical modeling for questionnaire data. Other issues are the implications of introducing different assessment criteria and procedures to the Italian university system.
