Contemporary Africa

60 years after independence, African nations still find it difficult to face a number of challenges, from establishing meaningful democratic institutions to establish social structures centered on the advancement of gender equality. This volume approaches these contemporary African challenges while combating a reflexive and facile Afro-Pessimism.

Rethinking the Holocaust

From putative 'success stories' such as Ghana and Rwanda to failed efforts in Zimbabwe and other countries, this volume brings together seven incisive case studies from diverse contexts including post-war Sierra Leone, Uganda, and the new nation of South Sudan to distil insights into the troubled progress of reform across the African continent.

Fundamentals of Human Resource Management

This manual (most of whose modules were originally published 2001-2002) aims at

strengthening various aspects of irrigation development, mainly emphasizing the engineering, agronomic and economic aspects of smallholder irrigation, in view of the limited practical references available in this area. It also introduces the irrigation practitioner to the social, health and environmental aspects, providing a bridge between the various disciplines involved in irrigation development.--Publisher's description.

Power in Contemporary Zimbabwe

The PISA 2009 Technical Report describes the methodology underlying the PISA 2009 survey. It examines additional features related to the implementation of the project at a level of detail that allows researchers to understand and replicate its analysis.

The Hard Road to Reform

One of the major challenges of sustainable development is the interdisciplinary nature of the issues involved. To this end, a team of conservation biologists, hunters, tourist operators, ranchers, wildlife and land managers, ecologists, veterinarians and economists was convened to discuss whether wildlife outside protected areas in Africa can be conserved in the face of agricultural expansion

and human population growth. They reached the unequivocal - if controversial - conclusion that wildlife can be an economic asset, especially in the African savannas, if this wildlife can be sustainably utilized through safari hunting and tourism. Using the African savannas as an example, *Wildlife Conservation by Sustainable Use* shows that in many instances sustainable wildlife utilization comprises an even better form of land use than livestock keeping. Even when population pressure is high, as in agricultural areas or in humid zones, and wild animal species can pose a serious cost to agriculture, these costs are mainly caused by small species with a low potential for safari hunting. Although ranching has a very low rate of return and is hardly ever profitable, the biggest obstacle to the model of sustainable wildlife use outlined in *Wildlife Conservation by Sustainable Use* is from unfair competition from the agricultural sector, such as subsidies and lack of taxation, resulting in market distortion for wildlife utilization. This book thus gives valuable evidence for a different way of working, providing arguments for removing such distortions and thereby facilitating financially sound land use and making it a rationally sound choice to conserve wildlife outside protected areas. The expert team of authors, most of whom came together at a workshop to thrash out the ideas that were then developed into the various chapters, has written a superb account of recent research on this complex subject, resulting in a book that is a major contribution to our understanding of sustainable use of land. The important conclusion is that wildlife conservation can be possible for landholders and local communities if they have a financial interest in protecting

wildlife on their lands.

Forests and Food

What have postcolonial Sub-Saharan African countries achieved in their education policies and programmes? How far have they contributed to successful attainment of the targeted 2015 Millennium Development Goals (MDGs) on education? What were the constraints and barriers for developing an education system that appeals to the needs of the sub-region? Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century: Post-Millennium Development Goals is an attempt to demonstrate that Sub-Saharan Africa has the potential and capability to provide solutions to challenges facing its desire and ability to provide sustainable education to its people. To that end, the contributors are academics with an African vision attempting to come up with African home-grown perspectives to fill the gap created by the lapse of the MDGs as the guiding vision and framework for educational provision in Africa and beyond. The book seeks to articulate and address African issues from an informed as well as objective African perspective. The book is also intended to provide insights to scholars who are interested in studying and understanding the nature of postcolonial education in the Sub-Saharan African region. Given the objectives and themes of this book, it is intended for academic scholars, undergraduate and graduate students, human rights scholars, curriculum developers, college and university academics, teachers,

education policy makers, international organisations, and local and international non-governmental organisations that are interested in African education policies and programmes. "Rethinking Postcolonial Education in Sub-Saharan Africa in the 21st Century provides contemporary reflections from multiple perspectives and repositions the issue of education at the forefront of the debates on African development." - Lamine Diallo, Associate Professor, Wilfrid Laurier University, Canada "The book is a welcome addition to discourses and analyses on education in sub-Saharan Africa with reference to a postcolonial critique and the Millennium Development Goals framework on education in Africa." - Michael Tonderai Kariwo, PhD, Instructor and Research Fellow, University of Alberta, Canada

Zimbabwe's Fast Track Land Reform

"The book first places Africa in the context of world history at the opening of the seventh century, before examining the general impact of Islamic penetration, the continuing expansion of the Bantu-speaking peoples, and the growth of civilizations in the Sudanic zones of West Africa"--Back cover.

A Theology of Reconstruction

Each volume in the 7-volume series The World of Science Education reviews

research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, North Africa and the Middle East, and Sub-Saharan Africa. The focus of this Handbook is on research in science education in mostly former British colonies in Sub-Saharan Africa and the scholarship that most closely support this program.

We Need New Names

Analyzes political, economic, and social developments since the defeat of ZANU-PF in the 2008 parliamentary election, the formation of the GNU, and the end of one-party rule in Zimbabwe.

Beyond the crises: Zimbabwe's prospects for transformation

Authored by world-class scientists and scholars, *The Handbook of Natural Resources, Second Edition*, is an excellent reference for understanding the consequences of changing natural resources to the degradation of ecological integrity and the sustainability of life. Based on the content of the bestselling and CHOICE-awarded *Encyclopedia of Natural Resources*, this new edition demonstrates the major challenges that the society is facing for the sustainability of all well-being on the planet Earth. The experience, evidence, methods, and

models used in studying natural resources are presented in six stand-alone volumes, arranged along the main systems of land, water, and air. It reviews state-of-the-art knowledge, highlights advances made in different areas, and provides guidance for the appropriate use of remote sensing and geospatial data with field-based measurements in the study of natural resources. Volume 1, *Terrestrial Ecosystems and Biodiversity*, provides fundamental information on terrestrial ecosystems, approaches to monitoring, and impacts of climate change on natural vegetation and forests. New to this edition are discussions on biodiversity conservation, gross and net primary production, soil microbiology, land surface phenology, and decision support systems. This volume demonstrates the key processes, methods, and models used through many case studies from around the world. Written in an easy-to-reference manner, *The Handbook of Natural Resources, Second Edition*, as individual volumes or as a complete set, is an essential reading for anyone looking for a deeper understanding of the science and management of natural resources. Public and private libraries, educational and research institutions, scientists, scholars, and resource managers will benefit enormously from this set. Individual volumes and chapters can also be used in a wide variety of both graduate and undergraduate courses in environmental science and natural science at different levels and disciplines, such as biology, geography, earth system science, and ecology.

Sheep and Goat Production and Marketing Systems in Ethiopia

This new edition of Rabbit Production has been fully updated throughout. Mainly concerning rabbits bred for meat and fur, it also contains practical information on pet rabbits, show rabbits and rabbits used as laboratory animals. Core topics are covered, including rabbit genetics, reproduction, health and diseases, behavior, welfare, fur and meat production, rabbit production in developing countries, slaughter and the marketing of rabbit products. Current areas of interest such as animal welfare and coat color genetics are expanded in the new edition. An important resource for all those involved in rabbit production, this book is also vital reading for students and researchers of animal science and meat production, as well as the keen amateur rabbit enthusiast.

Wildlife Conservation by Sustainable Use

The Fast Track Land Reform Programme in Zimbabwe has emerged as a highly contested reform process both nationally and internationally. The image of it has all too often been that of the widespread displacement and subsequent replacement of various people, agricultural-related production systems, facets and processes. The reality, however, is altogether more complex. Providing new and much-needed empirical research, this in-depth book examines how processes such as land acquisition, allocation, transitional production outcomes, social life, gender and tenure, have influenced and been influenced by the forces driving the

programme. It also explores the ways in which the land reform programme has created a new agrarian structure based on small- to medium-scale farmers. In attempting to resolve the problematic issues the reforms have raised, the author argues that it is this new agrarian formation which provides the greatest scope for improving Zimbabwe's agriculture and development. Based on a broader geographical scope than any previous study carried out on the subject, this is a landmark work on a subject of considerable controversy.

Biodiversity and Education for Sustainable Development

This book gathers interdisciplinary reflections from researchers, educators, and other experts on the subject of biodiversity closer to education and learning. The book also highlights its role as an added value to strategic principles for healthy ecosystems and sustainable human development. It promotes critical thinking and foster practices and attitudes for Education for Sustainable Development reconciling education with principles of human behaviour and nature. Readers especially find this book a timely resource in light of the Strategic Plan for Biodiversity 2011–2020, the Aichi Targets, and the new EU biodiversity strategy “Our life insurance, our natural capital: an EU biodiversity strategy to 2020”. Along with the challenge of ecosystems and public health, biodiversity conservation is essential for humanity's continued security and sustainability, as it touches on all aspects of people's lives.

Irrigation Manual

First published in 1976, this play from one of Africa's foremost dramatists is in the classic cannon. It is an incisive examination of the problems of independence and freedom in post-colonial Africa states, where few believe they have a stake in the future. In the words of one of the characters: "It was better while we waited. Now we have nothing to look forward to. We have killed our past and are busy killing our future". Francis Imbuga is a playwright and actor. He is the recipient of the Kenya National Academy of Sciences Distinguished Professional Award in Play Writing.

Cambridge International AS/A Level Geography Revision Guide 2nd edition

Volume VI of this acclaimed series is now available in an abridged paperback edition. The result of years of work by scholars from all over the world, The UNESCO General History of Africa reflects how the different peoples of Africa view their civilizations and shows the historical relationships between the various parts of the continent. Historical connections with other continents demonstrate Africa's contribution to the development of human civilization. Each volume is lavishly illustrated and contains a comprehensive bibliography. Volume VI covers the

period from the beginning of the nineteenth century to the onset of the European "scramble" for colonial territory in the 1880s. In spite of a growing European commercial, religious, and political presence during the first three quarters of the century, outside influences were felt indirectly by most African societies, and they made a number of culturally distinctive attempts to modernize, expand, and develop. These are detailed in four thematic chapters, twenty-three chapters detailing developments in specific areas, and two concluding chapters tracing the African diaspora and assessing the state of the Continent's political, economic, and cultural development on the eve of the European conquest.

Cambridge IGCSE® Combined and Co-ordinated Sciences Biology Workbook

The World of Science Education

Re-thinking Postcolonial Education in Sub-Saharan Africa in the 21st Century

Drawing on research from various historians, the author offers opinions on how to

define and explain the Holocaust, comparison to other genocides, and the connection between the Holocaust and the establishment of Israel.

Sustainable Intensification

Plant Biochemistry provides students and researchers in plant sciences with a concise general account of plant biochemistry. The edited format allows recognized experts in plant biochemistry to contribute chapters on their special topics. Up-to-date surveys are divided into four sections: the cell, primary metabolism, special metabolism, and the plant and the environment. There is a strong emphasis on plant metabolism as well as enzymological, methodological, molecular, biological, functional, and regulatory aspects of plant biochemistry. Illustrations of metabolic pathways are used extensively, and further reading lists are also included. The coverage of the subject is divided into four sections The plant cell-describing both molecular components and function Primary metabolism-including the pathways of carbohydrate, lipid, nitrogen, nucleic acid and protein metabolism as well as gene regulation Special metabolism-chapters on phenolics, isoprenoids and secondary nitrogen compounds The plant and the environment-discussions of pathology, ecology and biotechnology at the molecular level

Plant Biochemistry

Encyclopedia of Geomorphology

This volume advances the discussions of leadership in Africa's specific history, culture, economy, and politics. The book promotes an understanding of leadership and its paradoxes and illuminates the conditions under which political leadership has been produced, and how those conditions have shaped leaders.

Terrestrial Ecosystems and Biodiversity

Continued population growth, rapidly changing consumption patterns and the impacts of climate change and environmental degradation are driving limited resources of food, energy, water and materials towards critical thresholds worldwide. These pressures are likely to be substantial across Africa, where countries will have to find innovative ways to boost crop and livestock production to avoid becoming more reliant on imports and food aid. Sustainable agricultural intensification - producing more output from the same area of land while reducing the negative environmental impacts - represents a solution for millions of African farmers. This volume presents the lessons learned from 40 sustainable agricultural intensification programmes in 20 countries across Africa, commissioned as part of the UK Government's Foresight project. Through detailed case studies, the authors

of each chapter examine how to develop productive and sustainable agricultural systems and how to scale up these systems to reach many more millions of people in the future. Themes covered include crop improvements, agroforestry and soil conservation, conservation agriculture, integrated pest management, horticulture, livestock and fodder crops, aquaculture, and novel policies and partnerships.

Urban Agriculture

Reinforce and practice skills learned with step-by-step support from experts to help you achieve your maximum potential. - Improve your knowledge of geographical patterns, processes and changes with internationally focussed examples and case studies from around the world. - Clarify key points and ensure common mistakes are avoided with expert advice and tips. - Test and consolidate your knowledge with end of topic questions and answers, and exam-style questions for AS and A2 levels. - Plan and pace your revision with the revision planner.

National Democratic Reforms in Africa

Looks at the history of Africa since 1935 and Africa's relations with other continents during that time period.

Handbook on Sustainability Transition and Sustainable Peace

In recent years, the Zimbabwe crisis rendered the country and its citizens to be a typical case of 'failed states', the world over. Zimbabwean society was and is still confronted with different challenges which include political, economic and social problems. Attempts to overcome these challenges have thrown light on the power that rests within individuals and or groups to change and even revolutionize their localities, communities, states and ultimately the world at large. Through experience, individuals and groups have promoted ideas that have aided in changing mentalities, attitudes and behaviors in societies at different levels. This book brings together contributors from various academic disciplines to reflect on and theorize the contours of power, including the intrinsic and or extrinsic models of power, which pertain to individuals, communities, and or groups in order to transform society. Reflections are on various groups such as political movements, environmental movements, religious groups, advocacy groups, gender groups, to mention but a few, as they struggle against marginalization, discrimination, exploitation, and other forms of oppression showing their agency or compliance.

Biology for the IB Diploma Exam Preparation Guide

In this book 60 authors from many disciplines and from 18 countries on five

continents examine in ten parts: Moving towards Sustainability Transition; Aiming at Sustainable Peace; Meeting Challenges of the 21st Century: Demographic Imbalances, Temperature Rise and the Climate–Conflict Nexus; Initiating Research on Global Environmental Change, Limits to Growth, Decoupling of Growth and Resource Needs; Developing Theoretical Approaches on Sustainability and Transitions; Analysing National Debates on Sustainability in North America; Preparing Transitions towards a Sustainable Economy and Society, Production and Consumption and Urbanization; Examining Sustainability Transitions in the Water, Food and Health Sectors from Latin American and European Perspectives; Preparing Sustainability Transitions in the Energy Sector; and Relying on Transnational, International, Regional and National Governance for Strategies and Policies Towards Sustainability Transition. This book is based on workshops held in Mexico (2012) and in the US (2013), on a winter school at Chulalongkorn University, Thailand (2013), and on commissioned chapters. The workshop in Mexico and the publication were supported by two grants by the German Foundation for Peace Research (DSF). All texts in this book were peer-reviewed by scholars from all parts of the world.

Dahomean Narrative

Support understanding for the Cambridge IGCSE Biology syllabus (0610). The clear, concise approach will support your EAL learners in understanding crucial scientific

concepts. A step-by-step approach to the syllabus will help every learner reach their potential in science. It is written by an examiner, to help you support assessment confidence.

GCE O Level Examination Past Papers with Answer Guides: Chemistry

Education and Development in Zimbabwe

Over the past years, few African countries have been the focus of discussions and analyses generating a vast array of literature as much as Zimbabwe. The socioeconomic and political crises since the turn of the century have deeply transformed the country from the ideals of a vibrant freshly independent nation just two decades earlier. These transformations have necessitated the call for the restructuring of Zimbabwean society, polity, and economy. But this literature remains exclusively within the realm of academic thinking and theorising, with no concerted effort to move beyond this by explicitly drawing out the policy implications. *Beyond the Crises: Zimbabwe's Prospects for Transformation* is a welcome addition to the academic and policy literature with a much broader and

all-embracing focus in terms of policy interventions. By focusing on different aspects of social and economic justice, Murisa and Chikweche go beyond initiating a broad discussion on these two key pillars of human development with a view to suggesting possible future directions of practical solutions and policy development for the attainment of inclusive social and economic justice for Zimbabweans.

UNESCO General History of Africa, Vol. VI, Abridged Edition

This new edition, published on the occasion of the fiftieth anniversary of the founding by Melville Herskovits of the Program of African Studies at Northwestern University, brings back into print one of the classics in scholarly analysis and translation, written by one of the cultural anthropology. When this book was first published in 1958, Melville luminaries of American Herskovits, with his wife and collaborator, Frances, had spent over Twenty years studying the social networks, language, and oral traditions of the peoples of West Africa and their descendants in the New World. Dahomey, the major site of their African work, is in the country now known as the Republic of Benin. This volume, had two goals: in its collection of 155 narratives, to provide basic texts of the analytical side, to provide a general theory of mythology using new oral narratives and looking at their tradition culminating in a survey of different prevailing Theories of myth. The result is a wide-ranging collection, culled from an entire narrative tradition, that remains unique among anthropological publications.

PISA 2009 Technical Report

This title covers the entire syllabus for Cambridge International Examinations' International AS and A Level Biology (9700). It is divided into separate sections for AS and A Level making it ideal for students studying both the AS and the A Level and also those taking the AS examinations at the end of their first year. - Explains difficult concepts using language that is appropriate for students around the world - Provides practice throughout the course with carefully selected past paper questions at the end of each chapter We are working with Cambridge International Examinations to gain endorsement for this title.

Cambridge International AS and A Level Biology

Behold, a new thing

Governance and the Crisis of Rule in Contemporary Africa

A remarkable literary debut--shortlisted for the Man Booker Prize! The unflinching and powerful story of a young girl's journey out of Zimbabwe and to America. Darling is only ten years old, and yet she must navigate a fragile and violent world. In Zimbabwe, Darling and her friends steal guavas, try to get the baby out of

young Chipo's belly, and grasp at memories of Before. Before their homes were destroyed by paramilitary policemen, before the school closed, before the fathers left for dangerous jobs abroad. But Darling has a chance to escape: she has an aunt in America. She travels to this new land in search of America's famous abundance only to find that her options as an immigrant are perilously few. NoViolet Bulawayo's debut calls to mind the great storytellers of displacement and arrival who have come before her--from Junot Diaz to Zadie Smith to J.M. Coetzee--while she tells a vivid, raw story all her own.

Africa Since 1935

The book represents a contribution to policy formulation and design in an increasingly knowledge economy in Zimbabwe. It challenges scholars to think about the role of education, its funding and the egalitarian approach to widening access to education. The nexus between education, democracy and policy change is a complex one. The book provides an illuminating account of the constantly evolving notions of national identity, language and citizenship from the Zimbabwean experience. The book discusses educational successes and challenges by examining the ideological effects of social, political and economic considerations on Zimbabwe's colonial and postcolonial education. Currently, literature on current educational challenges in Zimbabwe is lacking and there is very little published material on these ideological effects on educational

development in Zimbabwe. This book is likely to be one of the first on the impact of social, political and economic meltdown on education. The book is targeted at local and international academics and scholars of history of education and comparative education, scholars of international education and development, undergraduate and graduate students, and professors who are interested in educational development in Africa, particularly Zimbabwe. Notwithstanding, the book is a valuable resource to policy makers, educational administrators and researchers and the wider community. Shizha and Kariwo's book is an important and illuminating addition on the effects of social, political and economic trajectories on education and development in Zimbabwe. It critically analyses the crucial specifics of the Zimbabwean situation by providing an in depth discourse on education at this historical juncture. The book offers new insights that may be useful for an understanding of not only the Zimbabwean case, but also education in other African countries. Rosemary Gordon, Senior Lecturer in Educational Foundations, University of Zimbabwe Ranging in temporal scope from the colonial era and its elitist legacy through the golden era of populist, universal elementary education to the disarray of contemporary socioeconomic crisis; covering elementary through higher education and touching thematically on everything from the pernicious effects of social adjustment programmes through the local deprofessionalization of teaching, this text provides a comprehensive, wide ranging and yet carefully detailed account of education in Zimbabwe. This engagingly written portrayal will prove illuminating not only to readers interested in Zimbabwe's education

specifically but more widely to all who are interested in how the sociopolitical shapes education- how ideology, policy, international pressures, economic factors and shifts in values collectively forge the historical and contemporary character of a country's education. Handel Kashope Wright, Professor of Education, University of British Columbia

Betrayal in the City

As population estimates for 2050 reach over 9 billion, issues of food security and nutrition have been dominating academic and policy debates. A total of 805 million people are undernourished worldwide and malnutrition affects nearly every country on the planet. Despite impressive productivity increases, there is growing evidence that conventional agricultural strategies fall short of eliminating global hunger, as well as having long-term ecological consequences. Forests can play an important role in complementing agricultural production to address the Sustainable Development Goals on zero hunger. Forests and trees can be managed to provide better and more nutritionally-balanced diets, greater control over food inputs—particularly during lean seasons and periods of vulnerability (especially for marginalised groups)—and deliver ecosystem services for crop production. However forests are undergoing a rapid process of degradation, a complex process that governments are struggling to reverse. This volume provides important evidence and insights about the potential of forests to reducing global hunger and

malnutrition, exploring the different roles of landscapes, and the governance approaches that are required for the equitable delivery of these benefits. *Forests and Food* is essential reading for researchers, students, NGOs and government departments responsible for agriculture, forestry, food security and poverty alleviation around the globe.

Educational Measurement and Evaluation

Ian Smith, former president of Rhodesia, spares few of his opponents as he gives a forthright account of one of Africa's most controversial political careers. Smith details his boyhood in Southern Rhodesia, his enlistment into the Royal Air Force and his active service during World War II. After the war, he joined the United Federal Party and initiated moves with various British governments under Macmillan and Douglas-Home. This resulted in the unilateral Declaration of Independence, and then Britain led the world in adopting sanctions against Rhodesia. He also tells how the British government's poor handling of the Rhodesian situation led to unrest in the area which Henry Kissinger tried unsuccessfully to quell. Eventually their first majority elections were held, the results of which Margaret Thatcher refused to recognise, leading to the Marxist-orientated rule of President Mugabe. This autobiography deals with many political events that have been conveniently glossed over. It presents a fascinating portrait of one of the 20th century's most distinguished political figures.

Essential Biology for Cambridge IGCSE®

The Cambridge IGCSE® Combined and Co-ordinated Sciences series is tailored to the 0653 and 0654 syllabuses for first examination in 2019, and all components of the series are endorsed by Cambridge International Examinations. This Biology Workbook is tailored to the Cambridge IGCSE® Combined Science 0653 and Co-ordinated Sciences 0654 syllabuses for first examination in 2019 and is endorsed for learner support by Cambridge International Examinations. Covering both the Core and the Supplement material, this workbook contains exercises arranged in the same order as the coursebook and are clearly marked according to the syllabus they cover. Developing students' scientific skills, these exercises are complemented by self-assessment checklists to help them evaluate their work as they go. Answers are provided at the back of the book.

UNESCO General History of Africa, Vol. III, Abridged Edition

Geomorphology, the discipline which analyzes the history and nature of the earth's surface, deals with the landforms produced by erosion, weathering, deposition, transport and tectonic processes. In recent decades there have been major developments in the discipline and these are reflected in this major Encyclopedia, the first such reference work in the field to be published for thirty-five years.

Encyclopedia of Geomorphology has been produced in association with the International Association of Geomorphologists (IAG) and has a truly global perspective. The entries have been written by an international editorial team of contributors, drawn from over thirty countries, who are all among the leading experts in the discipline. In two lavishly illustrated volumes, Encyclopedia contains nearly 700 alphabetically organized entries to provide a comprehensive guide both to specific landforms and to the major types of geomorphological processes that create them. The Encyclopedia also demonstrates the major developments that have taken place in recent years in our knowledge of tectonic and climatic changes and in the use of new techniques such as modelling, remote sensing and process measurement. Older concepts, however, are not forgotten and provide an historical perspective on the development of ideas. Both accessible and authoritative, Encyclopedia of Geomorphology is destined to become the definitive resource for students, researchers and applied practitioners in the field of geomorphology and the cognate disciplines of geography, earth science, sedimentology and environmental science.

Rabbit Production

Biology for the IB Diploma, Second edition covers in full the requirements of the IB syllabus for Biology for first examination in 2016.
