### **Iowa Journal of History**

Examination of the striking new style of writing history in the twelfth century, by men such as Gaimar, Wace and Ambroise.

### **A People's History of the United States**

Making Slavery History focuses on how commemorative practices and historical arguments about the American Revolution set the course for antislavery politics in the nineteenth century. The particular setting is a time and place in which people were hyperconscious of their roles as historical actors and narrators: Massachusetts in the period between the Revolution and the Civil War. This book shows how local abolitionists, both black and white, drew on their state's Revolutionary heritage to mobilize public opposition to Southern slavery. When it came to securing the citizenship of free people of color within the Commonwealth, though, black and white abolitionists diverged in terms of how they idealized black historical agency. Although it is often claimed that slavery in New England is a history long concealed, Making Slavery History finds it

hidden in plain sight. From memories of Phillis Wheatley and Crispus Attucks to representations of black men at the Battle of Bunker Hill, evidence of the local history of slavery cropped up repeatedly in early national Massachusetts. In fixing attention on these seemingly marginal presences, this book demonstrates that slavery was unavoidably entangled in the commemorative culture of the early republic—even in a place that touted itself as the "cradle of liberty." Transcending the particular contexts of Massachusetts and the early American republic, this book is centrally concerned with the relationship between two ways of making history, through social and political transformation on the one hand and through commemoration, narration, and representation on the other. *Making Slavery History* examines the relationships between memory and social change, between histories of slavery and dreams of freedom, and between the stories we tell ourselves about who we have been and the possibilities we perceive for who we might become.

## **An Argumentation of Historians**

Part research manual, part study guide, and part introduction to the study of history, *Essaying the Past* is a complete resource for high school, college, and graduate level students. Jim Cullen guides the reader through the nuts and bolts of producing good historical prose, discussing key strategies such as framing questions, developing a strong introduction and topic sentences, choosing good evidence, and the important role of revision. Beginning with a survey of the field, this book offers useful insight into how to read and understand a wide variety of historical sources, as well as providing an introduction to historiography, helpful tips for conducting research, and a discussion of what it means to think and read analytically. Cullen also offers a set of appendices that cover the major issues facing students of history today, among them the dangers of plagiarism, the role of the Internet, and the need for correctly annotated and formatted footnotes and bibliographies.

## **What is History?**

This book collects a number of Richard Levin's essays, beginning with his well-known PMLA article of 1988 on *Feminist Thematics and Shakespearean Tragedy* and continuing through the 1990s, that examine and evaluate some of the most important aspects of the new critical approaches to the interpretations of the works of Shakespeare and his contemporaries—principally the New Historicism, feminism, and revisionist versions of Marxism and Freudianism. In these essays he is looking not only for rational arguments in these approaches, but also for a rational argument with their practitioners, and therefore he reprints several of the responses that these essays have elicited (including the PMLA Forum letter signed by twenty-four people who objected to *Feminist Thematics*) along with his answers to them, which contribute to this critique of the present state of the discourse in this field.

## **The Historian's Toolbox**

New York Times Bestseller In the most ambitious one-volume American history in decades, award-winning historian and New Yorker writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's groundbreaking investigation places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The American experiment rests on three ideas—"these truths," Jefferson called them—political equality, natural rights, and the sovereignty of the people. And it rests, too, on a fearless dedication to inquiry, Lepore argues, because self-government depends on it. But has the nation, and democracy itself, delivered on that promise? *These Truths* tells this uniquely American story, beginning in 1492, asking whether the course of events over more than five centuries has proven the nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with arresting sketches of both well-known and lesser-known Americans, from a parade of presidents and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including Frederick Douglass, the famed abolitionist orator; William Jennings Bryan, the three-time presidential candidate and ultimately tragic populist; Pauli Murray, the visionary civil rights strategist; and Phyllis Schlafly, the uncredited architect of modern conservatism. Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have fought to end immigration. "A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of citizenship. "The past is an inheritance, a gift and a burden," *These Truths* observes. "It can't be shirked. There's nothing for it but to get to know it."

## **The Restless Clock**

A core principle of modern science holds that a scientific explanation must not attribute will or agency to natural phenomena. *The Restless Clock* examines the origins and history of this, in particular as it applies to the science of living things. This is also the story of a tradition of radicals—dissenters who embraced the opposite view, that agency is an essential and ineradicable part of nature. Beginning with the church and courtly automata of early modern Europe, Jessica Riskin guides us through our thinking about the extent to which animals might be understood as mere machines. We encounter fantastic robots and cyborgs as well as a cast of scientific and philosophical luminaries, including Descartes and Leibnitz, Lamarck and Darwin, whose ideas gain new relevance in Riskin's hands. The book ends with a riveting discussion of how the dialectic continues in genetics, epigenetics, and evolutionary biology, where work continues to naturalize different forms of agency. *The Restless Clock* reveals the deeply buried roots of current debates in artificial intelligence,

cognitive science, and evolutionary biology.

### **Research Methods for History**

A revolution in history education is propelling historical thinking and knowing to the forefront of history and social studies education in North America and beyond. Teachers, teacher education programs, schools, and ministries of education across Canada are all among those embracing the idea that knowing history means knowing how to think historically. *Becoming a History Teacher* is a collection of thoughtful essays by history teachers, historians, and teacher educators on how to prepare student teachers to think historically and to teach historical thinking. Covering the teacher's experience before, during, and after formal certification, *Becoming a History Teacher* contains a wide range of resources for teachers and educators, including information on the latest research in history education and examples of successful history teaching activities.

### **These Truths: A History of the United States**

The seventh book in the bestselling *Chronicles of St Mary's* series which follows a group of tea-soaked disaster magnets as they hurtle their way around History. If you love Jasper Fforde or Ben Aaronovitch, you won't be able to resist Jodi Taylor. Rules are meant to be broken, aren't they? 'I've done some stupid things in my time. I've been reckless. I've broken a few rules. But never before have I ruined so many lives or left such a trail of destruction behind me.' Max has never been one for rules. They tend to happen to other people. But this time she's gone too far. And everyone at St Mary's is paying the price. With the History Department disintegrating around her and grounded until the end of time, how can she ever put things right? Readers love Jodi Taylor: 'Once in a while, I discover an author who changes everything Jodi Taylor and her protagonist Madeleine "Max" Maxwell have seduced me' 'A great mix of British proper-ness and humour with a large dollop of historical fun' 'Addictive. I wish St Mary's was real and I was a part of it' 'Jodi Taylor has an imagination that gets me completely hooked' 'A tour de force'

## **The Lessons of History**

The Historian's Toolbox introduces students to the theory, craft, and methods of history and equips them with a series of tools to research and understand the past. Written in an engaging and entertaining style, and filled with fascinating examples, this best-selling "how to" book opens up an exciting world behind historical research and writing. This fourth edition expands the repertory of tools and techniques available to students entering the workshop of history. These include materials on the Kennedy assassination, the litigation of Van Gogh's Night Café, local town histories, contemporary history, Twitter, and the contemplation of the end of history as well as the Sixth Extinction in a new epilogue. The book demonstrates the relevance and expanding possibilities of the study of history in our cacophonous information age of tweetstorms and fake news; it emphasises the increasing value of critical thinking, facts and evidence in the face of political lies and conspiracy theories. Material added to the fourth edition will resonate with a new generation of computer-literate readers in the face of climate change. The Historian's Toolbox continues to be a seminal text for supporting students throughout their study of history and an accessible teaching tool for instructors.

## **The New Historians of the Twelfth-century Renaissance**

In one volume, these essentially unabridged selections from the works of the proslavery apologists are now conveniently accessible to scholars and students of the antebellum South. The Ideology of Slavery includes excerpts by Thomas R. Dew, founder of a new phase of proslavery militancy; William Harper and James Henry Hammond, representatives of the proslavery mainstream; Thornton Stringfellow, the most prominent biblical defender of the peculiar institution; Henry Hughes and Josiah Nott, who brought would-be scientism to the argument; and George Fitzhugh, the most extreme of proslavery writers. The works in this collection portray the development, mature essence, and ultimate fragmentation of the proslavery argument during the era of its greatest importance in the American South. Drew Faust provides a short introduction to each selection, giving information about the author and an account of the origin and publication of the document itself. Faust's introduction to the anthology traces the early historical treatment of proslavery thought and examines the recent resurgence of interest in the ideology of the Old South as a crucial component of powerful relations within that society. She notes the intensification of the proslavery argument between 1830 and 1860, when southern proslavery thought became more systematic and self-conscious, taking on the characteristics of a formal ideology with its resulting social movement. From this intensification came the pragmatic tone and inductive mode that the editor sees as a characteristic of southern proslavery writings from the 1830s onward. The selections, introductory comments, and bibliography of secondary works on the proslavery argument will be of value to readers interested in the history of slavery and of nineteenth-century American thought.

## **The Paradoxes of History and Memory in Post-Colonial Sierra Leone**

Modern biblical scholarship's commitment to the historical-critical method in its efforts to write a history of Israel has created the central and unavoidable problem of writing an objective and critical history of Palestine through the biblical literature with the methods of Biblical Archaeology. 'Biblical Narrative and Palestine's History' brings together key essays on historical method and the archaeology and history of Palestine. The essays employ comparative and formalistic techniques to illuminate the allegorical and mythical in Old Testament narrative traditions from Genesis to Nehemiah. In so doing, the volume presents a detailed review of central and radical changes in both our understanding of biblical traditions and the archaeology and history of Palestine. The study offers an analysis of Biblical narrative as rooted in ancient Near Eastern literature since the Bronze Age.

## **History of the United States of America, from the Discovery of the Continent [to 1789]**

In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general reader.

## **Essaying the Past**

## **Lies, Damned Lies, and History**

What is history and how does it impact biblical interpretation and theology? Allegorizing History seeks to begin answering this question by arguing that conceptions of the past and the purpose(s) of history impact biblical interpretation and vice versa. Furthermore, it is shown how philosophy and theology inevitably affect the understandings and practice of historical writing, thereby making all history figural or allegorical. Famous for his Ecclesiastical History of the Anglo-Saxon People and biblical commentaries, the Venerable Bede is studied in dialogue with Augustine, contemporary theology, and historical theory to make this interdisciplinary argument.

## **Becoming a History Teacher**

### **The Iowa Journal of History and Politics**

What is history and why should we study it? Is there such a thing as historical truth? Is history a science? One of the most accomplished historians at work today, John Lewis Gaddis, answers these and other questions in this short, witty, and humane book. The Landscape of History provides a searching look at the historian's craft, as well as a strong argument for why a historical consciousness should matter to us today. Gaddis points out that while the historical method is more sophisticated than most historians realize, it doesn't require unintelligible prose to explain. Like cartographers mapping landscapes, historians represent what they can never replicate. In doing so, they combine the techniques of artists, geologists, paleontologists, and evolutionary biologists. Their approaches parallel, in intriguing ways, the new sciences of chaos, complexity, and criticality. They don't much resemble what happens in the social sciences, where the pursuit of independent variables functioning with static systems seems increasingly divorced from the world as we know it. So who's really being scientific and who isn't? This question too is one Gaddis explores, in ways that are certain to spark interdisciplinary controversy. Written in the tradition of Marc Bloch and E.H. Carr, The Landscape of History is at once an engaging introduction to the historical method for beginners, a powerful reaffirmation of it for practitioners, a startling challenge to social scientists, and an effective skewering of post-modernist claims that we can't know anything at all about the past. It will be essential reading for anyone who reads, writes, teaches, or cares about history.

## **History of the United States of America**

History is not a mere chronicle of facts, but a dialogue between competing interpretations of the past; it should be taught as such. The book includes the rationale for the study of history, the specific thinking skills required by the discipline, and

methods for students acquiring, processing, and applying information.

## **Northwest Lands, Northwest Peoples**

This collection of essays explores the environmental history of the Pacific Northwest of North America, addressing questions of how humans have adapted to the northwestern landscape and modified it over time, and how the changing landscape in turn affected human society, economy, laws and values.

## **Making Slavery History**

Recent Themes on Historians and the Public represents some of the best recent writing on the public role of historians. These articles and interviews from *Historically Speaking* examine the relationship between historians and their audiences. Award-winning "popular historian" Adam Hochschild begins by discussing the relationship between popular and academic history. An all-star cast of historians and editors offer their responses, forming a fascinating extended conversation. This forum addresses questions such as what the public role of the historian should be and whether practicing history requires a license. In addition the book contains a candid exchange about the state of the history profession at the beginning of the twenty-first century. Designed to engage both students and general readers, *Recent Themes on Historians and the Public* illuminates the controversy over the role of historians in the public sphere.

## **Collingwood's The Idea of History**

## **The Truth of History**

The history of economic thought has always attracted some of the brightest minds in the discipline. These chroniclers of development have helped form our current views, and it is no surprise that many among them have been at the forefront of new movements in the history of ideas. This notable collection summarizes the work of these key historians of economics and attempts to quantify their impact. Some of the writers covered, such as Friedrich Hayek and Joan Robinson, are already assured of their place among the greatest economists of the twentieth century, but the collection also stresses the influence of those still active in shaping our perceptions - including Mark Blaug, Samuel Hollander and Donald Winch. Written by an impressive roster of contributors, many of whom are themselves well-known in the history of economic thought, this key book features writings from John Creedy, Roger Blackhouse and Neil De Marchi, as well as the editors of the collection as a whole, Warren J. Samuels and Steven Medema.

### **Looking for an Argument**

A concise survey of the culture and civilization of mankind, *The Lessons of History* is the result of a lifetime of research from Pulitzer Prize-winning historians Will and Ariel Durant. With their accessible compendium of philosophy and social progress, the Durants take us on a journey through history, exploring the possibilities and limitations of humanity over time. Juxtaposing the great lives, ideas, and accomplishments with cycles of war and conquest, the Durants reveal the towering themes of history and give meaning to our own.

## **And the Rest is History**

Modern relativism and postmodern thought in culture and language challenge the 'truth' of history. This book considers how all historians, confined by the concepts and forms of argument of their own cultures, can still discover truths about the past. The Truth of History presents a study of various historical explanations and interpretations and evaluates their success as accounts of the past. C. Behan McCullagh contests that the variety of historical interpretations and subjectivity does not exclude the possibility of their truth. Through an examination of the constraints of history, the author argues that although historical descriptions do not mirror the past they can correlate with it in a regular and definable way. Far from debating in the abstract and philosophical only, the author beds his argument in numerous illuminating concrete historical examples. The Truth of History explores a new position between the two extremes of believing that history perfectly represents the past and that history can tell us nothing true of the past.

## **Allegorizing History**

The Idea of History is the best known work of the Oxford philosopher and historian RG Collingwood. Published posthumously

in 1946 it is, in effect, two books: a historiography and a philosophy of history. Students look to Collingwood for a history of thinking about history, and to discover his ideas about the nature of historical understanding. It is an indispensable text for historians and philosophers yet it is also highly challenging and many of Collingwood's innovations have been seriously misunderstood. The primary focus of this book is on Collingwood's actual arguments, especially the most radical of these, with the aim of elucidating their construction and appraising them in the clearest possible way. This guide is the ideal companion to Collingwood's classic text both for students coming to it for the first time and for those wishing to consider its arguments afresh. It offers clear and concise accounts of the book's composition; the intellectual context of Collingwood's ideas; its central arguments concerning the nature of history; and its reception and influence.
