"Brooklyn Borough President and mayoral candidate Eric Adams is on a mission to tackle one of the most stubborn health problems in the country: chronic disease in the African American community. African Americans are heavier and sicker than any other group in the U.S., with nearly half of all black adults suffering from some form of cardiovascular disease. After Adams woke up with severe vision loss one day in 2016, he learned that he was one of the nearly 5 million black people living with diabetes-and, according to his doctor, he would have it for the rest of his life. A police officer for more than two decades, Adams was a connoisseur of the fast-food dollar menu. Like so many Americans with stressful jobs, the last thing he wanted to think about was eating healthfully. Fast food was easy, cheap, and comfortable. His diet followed him from the squad car to the state senate, and then to Brooklyn Borough Hall, where it finally caught up with him"--

The General Theory of Employment, Interest, and Money, written by legendary author John Maynard Keynes is widely considered to be one of the top 100 greatest books of all time. This masterpiece was published right after the Great Depression. It sought to bring about a revolution, commonly referred to as the ‘Keynesian Revolution’, in the way economists thought—especially challenging the proposition that a market economy tends naturally to restore itself to full employment on its own. Regarded widely as the cornerstone of Keynesian thought, this book challenged the established classical economics and introduced new concepts. ‘The General Theory of Employment, Interest, and Money’ transformed economics and changed the face of modern macroeconomics. Keynes’ argument is based on the idea that the level of employment is not determined by the price of labour, but by the spending of money. It gave way to an entirely new approach where employment, inflation and the market economy are concerned.
