At last lesbian culture is becoming more visible in the mainstream media. From *The O.C.* to *The L Word*, gay women (and the occasional bi-curious straight girl) are portrayed coming to terms with their sexuality and embracing it. But the journey from sexual curiosity to finally coming out can be confusing without proper guidance and empowering role models. Lauren Blitzler and Lauren Levin know firsthand the challenges that lesbian women face in our society, and *SAME SEX IN THE CITY* is their uplifting and at times irreverent response. The Laurens are both prominent figures in the New York lesbian community, though their stories are very different. Here they relate their own experiences and those of

the women they interview, as well as offer serious advice, alluring anecdotes, and a positive attitude for girls who know they're gay - and those who are wondering about their sexuality but are not yet sure whether their Prince Charming is really a Cinderella. Part confessional, part informational, *SAME SEX IN THE CITY* covers the gamut of lesbian life from dating to heartbreak, from hooking up with straight chicks to being out at work. It's the book that millions of women have been searching for - a step-by-step guide that will help every woman come to terms with and celebrate her sexuality, whatever it may be.

It covers treatment methods for conditions ranging from hyperfunctional motor disorders (dystonia, tremor, dysphagia), to afferent pain disorders (temporomandibular joint disorder, migraine, trigeminal neuralgia) to autonomic disorders (hypersalivation, Frey's syndrome). In each of the indications, the written material reviews the effects of the toxin on the nervous system, central pain thresholds, and central motor pathways. Special

Features: Reviews the pharmacology, indications, mechanisms of action, and technique for each use of botulinum neurotoxin Provides detailed information on the anatomy, treatment methods, follow-up care, and possible complications for each disorder Includes online access to professionally produced videos in which Dr. Blitzer demonstrates injection techniques for the disorders in the book Contains vivid, full color illustrations and photographs that clarify information in the text Focusing specifically on injection techniques for the therapeutic uses of botulinum neurotoxin for treating head and neck disorders, this manual fills an important gap in the literature. It gives clinicians current, authoritative, and in-depth information on administering botulinum neurotoxin most effectively for the head and neck disorders of their patients.

The team approach to voice treatment is realized through the contributions of laryngologists, speech-language pathologists, singing

voice specialists, nurses, physiotherapists, acting voice trainers, and others. The reader will find discussion of various treatment procedures, including surgical, pharmacological, and behavioral. This text presents essential information that allows for the effective interaction of various specialties. For example, behavioral specialists can draw on the information that is given on surgery, trauma and injury, and medications. This book is at once a template for team-based treatment and a deep informational resource for treatment alternatives. Its scope and depth make it a book that the voice specialist will want to keep close at hand. New to this edition: New content on topics such as technology in the studio and pedagogy for children. Many topics have been expanded to highlight current practices, to include information published since the previous edition, and to present current management approaches. Chapters have been rewritten extensively to include the most current techniques and to reflect the latest beliefs and practices, as well as the most recent information from the evolving literature in this field. Chapter 16 on nutrition has been completely rewritten and includes important changes in criteria and strategy, reflecting developments in nutritional science over the past decade. "Every line resonates with a wind that crosses oceans."—Jamaal May "Zamora's work is real life turned into myth and myth made real life."

—Glappitnova Javier Zamora was nine years old when he traveled unaccompanied 4,000 miles, across multiple borders, from El Salvador to the United States to be reunited with his parents. This dramatic and hope-filled poetry debut humanizes the highly charged and polarizing rhetoric of border-crossing; assesses borderland politics, race, and immigration on a profoundly personal level; and simultaneously remembers and imagines a birth country that's been left behind. Through an unflinching gaze, plainspoken diction, and a combination of Spanish and English, *Unaccompanied* crosses rugged terrain where families are lost and reunited, coyotes lead migrants astray, and "the thin white man let us drink from a hose / while pointing his shotgun." From "Let Me Try Again":

He knew we weren't Mexican. He must've remembered his family coming over the border, or the border coming over them, because he drove us to the border and told us next time, rest at least five days, don't trust anyone calling themselves coyotes, bring more tortillas, sardines, Alhambra. He knew we would try again. And again—like everyone does. Javier Zamora was born in El Salvador and immigrated to the United States at the age of nine. He earned a BA at UC-Berkeley, an MFA at New York University, and is a 2016–2018 Wallace Stegner Fellow at Stanford University.
