Construction Superintendents

"The transition from elementary to middle school can be a scary time for both students and their parents. Dr. Parks's book is real-life advice from a master teacher that will address most of your concerns." Tommy Hurt Principal, Georgetown Middle School. Georgetown, KY "An excellent handbook which parents of every new middle schooler should read, and reread with their son or daughter as they begin these formative and impressionable years of middle school. Herein are the keys to success." Dr. Dallas Blankenship Superintendent, Scott Co. Public Schools Parents are seldom-if ever-prepared for the enormous changes their child faces entering middle school. The sheltered, structured, and nurturing environment that is elementary school gives way to the fast-paced, organized chaos of middle school. Students often feel more thrown into, rather than eased into, the middle school world, and parents of first-time middle schoolers often feel more lost than their children. The sixth grade is the time when Mom and Dad start to feel they are losing their little one forever, and-in a very real sense-they are. Help! My Child is Starting Middle School! is merely an effort to help parents and their children get off to a successful start in middle school. Although primarily written for parents, portions of the book can be read and used by middle schoolers themselves. At the end of each chapter are presented numerous real-world middle school situations, which may very well occur. As these are read, parents should consider how they might address

the situations, and then discuss with their child their thoughts, and how they might deal with alternatives. In discussing these together, both parent and middle schooler will be better prepared for what's coming in middle school.

The International Handbook of Leadership for Learning brings together chapters by distinguished authors from thirty-one countries in nine different regions of the world. The handbook contains nine sections that provide regional overviews; a consideration of theoretical and contextual aspects; system and policy approaches that promote leadership for learning with a focus on educating school leaders for learning and the role of the leader in supporting learning. It also considers the challenge of educating current leaders for this new perspective, and how leaders themselves can develop leadership for learning in others and in their organisations, especially in diverse contexts and situations. The final chapter considers what we now know about leadership for learning and looks at ways this might be further improved in the future. The book provides the reader with an understanding of the rich contextual nature of learning in schools and the role of school leaders and leadership development in promoting this. It concludes that the preposition 'for' between the two readily known and understood terms of 'leadership' and 'learning' changes everything as it foregrounds learning and complexifies, rather than simplifies, what that word may mean. Whereas common terms such as 'instructional leadership' reduce learning to 'outcomes', leadership for learning embraces a much wider, developmental view of learning.
