Without Lean leaders, there can be no Lean. If an organization wants to be Lean, its leaders must lead using Lean principles. Put another way, until the top of your organization fully embraces Lean, the rest of your organization will never be Lean.

The Lean Leader: A Personal Journey of Transformation uses a compelling novel format to tackle the nuts and bolts of leading a Lean transformation. Readers follow along as the characters face real crises and what seem to be unreasonable deadlines. As the story progresses, readers will see how the main character, Don, and his colleagues transform from being "command and control" autocrats—those who make decisions and bark orders—to more Socratic coaches and mentors. As Don and his staff come to realize that the folks they employ are the real experts in the processes they control, you will learn why it behooves you to do more asking than telling. You will come to realize that a leader's greatest skill must be in coaching great performance from their people. You will also witness the difference between managing and leading. After reading this book, you will understand why it's so important to shed the decision-making tasks that have cluttered your days, and how to delegate those decisions to employees who are closer to the action. You will learn how important it is to look over the horizon to identify upcoming challenges, define and communicate new courses of action, and compel others to follow. Most importantly, you will learn exactly what it takes to lead a Lean organization that thrives socially, as well as financially.

A commentary, critical and explanatory, on the Old and New Testaments, by R. Jamieson, A.R. Fausset and D. Brown. (Portable comm.).

Leviathan or The Matter, Forme and Power of a Common-Wealth Ecclesiastical and Civil is a book written by an English materialist philosopher Thomas Hobbes about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man. Hobbes uses this character to describe a powerful state ("God of the death"). He starts with a postulate about a natural human state ("the war of all against all") and develops the idea "man is a wolf to a man". When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights – to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.
