This illustrated history of the British campaign in the Crimean War has been compiled using letters from the front and various other resources, including maps and battle plans.

Exploring Networked Urban Mobilities

Untangling the long history of neoliberalism Neoliberalism is dead. Again. Yet the philosophy of the free market and the strong state has an uncanny capacity to survive, and even thrive, in times of crisis. Understanding neoliberalism's longevity and its latest permutation requires a more detailed understanding of its origins and development. This volume breaks with the caricature of neoliberalism as a simple, unvariegated belief in market fundamentalism and homo economicus. It shows how neoliberal thinkers perceived institutions from the family to the university, disagreed over issues from intellectual property rights and human behavior to social complexity and monetary order, and sought to win consent for their project through the creation of new honors, disciples, and networks. Far from a monolith, neoliberal thought is fractured and, occasionally, even at war with itself. We can begin to make sense of neoliberalism's nine lives only by understanding its own tangled and complex history.

Writing Your Journal Article in Twelve Weeks

In *Rhetoric, Irony, and Law in the Formation of Canadian Civil Culture*, Michael Dorland and Maurice Charland examine how, over the roughly 400-year period since the encounter of First Peoples with Europeans in North America, rhetorical or discursive fields took form in politics and constitution-making, in the formation of a public sphere, and in education and language. The study looks at how these fields changed over time within the French regime, the British regime, and in Canada since 1867, and how they converged through trial and error into a Canadian civil culture. The authors establish a triangulation of fields of discourse formed by law (as a technical discourse system), rhetoric (as a public discourse system), and irony (as a means of accessing the public realm as the key pillars upon which a civil culture in Canada took form) in order to scrutinize the process of creating a civil culture. By presenting case studies ranging from the legal implications of the transition from French to English law to the continued importance of the Louis Riel case and trial, the authors provide detailed analyses of how communication practices form a common institutional culture. As scholars of communication and rhetoric, Dorland and Charland have written a challenging examination of the history of Canadian governance and the central role played by legal and other discourses in the formation of civil culture.

Nine Lives of Neoliberalism

This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

The war in Georgia. Tensions with Ukraine and other nearby countries. Moscow's bid to consolidate its "zone of privileged interests" among the Commonwealth of Independent States. These volatile situations all raise questions about the nature of and prospects for Russia's relations with its neighbors. In this book, Carnegie scholar Dmitri Trenin argues that Moscow needs to drop the notion of creating an exclusive power center out of the post-Soviet space. Like other former European empires, Russia will need to reinvent itself as a global player and as part of a wider community. Trenin's vision of Russia is an open Euro-Pacific country that is savvy in its use of soft power and fully reconciled with its former borderlands and dependents. He acknowledges that this scenario may sound too optimistic but warns that the alternative is not a new version of the historic empire but instead is the ultimate marginalization of Russia.

`A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company.' - Joan Bolker, author of Writing Your Dissertation in Fifteen Minutes a Day `Humorous, direct, authentic a seamless weave of experience, anecdote, and research.' - Kathleen McHugh, professor and director of the UCLA Center for the Study of Women Wendy Laura Belcher's Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in

their fields. Each week, readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks, they send their article to a journal. This invaluable resource is the only guide that focuses specifically on publishing humanities and social science journal articles.

The Darker Side of Western Modernity

This volume brings together selected articles published in University World News (UWN) and International Higher Education (IHE) between 2011 and 2016. Researchers, policy makers, and practitioners alike further the development of higher education as a field of study through public and ongoing conversations. It is news, analysis, and commentary publications like UWN and IHE that facilitate this dialogue and keep pace with the most up-to-date developments in the field. Together, the articles included in this volume—alongside the section introductions—offer a rich and relevant picture of the dynamic state of higher education globally. While both publications are freely available online, this book provides a thematically coherent selection of articles, offering an accessible and analytic perspective on the pressing concerns of contemporary higher education.

The idea of the ICMI Study 13 is outlined as follows: Education in any social environment is influenced in many ways by the traditions of these environments. This study brings together leading experts to research and report on mathematics education in a global context. Mathematics education faces a split phenomenon of difference and correspondence. A study attempting a comparison between mathematics education in different traditions will be helpful to understanding this phenomenon.

The New Economic Sociology

Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs,

and reduce poverty provided that developing countries implement deeper reforms to promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

Turkey's Pivot to Eurasia

This volume represents the most comprehensive collection ever produced of empirical research on Holocaust education around the world. It comes at a critical time, as the world observes the 70th anniversary of the liberation of Auschwitz. We are now at a turning point, as the generations that witnessed and survived the Shoah are slowly passing on. Governments are charged with ensuring that this defining event of the 20th century takes its rightful place in the schooling and the historical consciousness of their peoples. The policies and practices of Holocaust education around the world are as diverse as the countries that grapple with its history and its meaning. Educators around the globe struggle to reconcile national histories and memories with the international realities of the Holocaust and its implications for the present. These efforts take place at a time when scholarship about the Holocaust itself has made great strides. In this book, these issues are framed by some of the leading voices in the field, including Elie Wiesel and Yehuda Bauer, and then explored by many distinguished scholars who represent a wide range of expertise. Holocaust education is of such significance, so rich in meaning, so powerful in content, and so diverse in practice that the need for extensive, high-quality empirical research is critical. This book provides exactly that.

Four Nations Approaches to Modern 'British' History

This collection brings together leading and emerging scholars to evaluate the viability of four nations approaches to the history of the United Kingdom from the eighteenth to the twentieth century. It recognises the separate histories of England, Ireland, Scotland and Wales and explores the extent to which they share a common, 'British' history. They are entwined, with the points at which they interweave and detach dependent upon the nature of our inquiry, where we locate our 'core' and our 'periphery', and the 'cause' and 'effect' of our subject. The collection demonstrates that four nations frameworks are relevant to a variety of topics and tests the limits of the methodology. The chapters illuminate the changing shape of modern British history writing, and provide fresh perspectives on subjects ranging from state governance, nationalism and Unionism, economics, cultural identities and social networking.

Over the past 20 years European theatre underwent fundamental changes in terms of aesthetic focus, institutional structure and in its position in society. The impetus for these changes was provided by a new generation in the independent theatre scene. This book brings together studies on the state of independent theatre in different European countries,

focusing on the fields of dance and performance, children and youth theatre, theatre and migration and post-migrant theatre. Additionally, it includes essays on experimental musical theatre and different cultural policies for independent theatre scenes in a range of European countries.

Understanding Global Higher Education

This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Language and food are universal to humankind. Language accomplishes more than a pure exchange of information, and food caters for more than mere subsistence. Both represent crucial sites for socialization, identity construction, and the everyday fabrication and perception of the world as a meaningful, orderly place. This volume on Culinary Linguistics contains an introduction to the study of food and an extensive overview of the literature focusing on its role in interplay with language. It is the only publication fathoming the field of food and food-related studies from a linguistic perspective. The research articles assembled here encompass a number of linguistic fields, ranging from historical and ethnographic approaches to literary studies, the teaching of English as a foreign language, psycholinguistics, and the study of computer-mediated communication, making this volume compulsory reading for anyone interested in genres of food discourse and the linguistic connection between food and culture. Exploring Networked Urban Mobilities explores different conceptual and theoretical angles between social practices and urban environments, culture, infrastructures, technologies, and the politics of mobility. The book introduces the concept of networked urban mobilities and lays out a research agenda for the future of mobility studies. Each of the contributors represents a specific approach in the field and each article provides cutting-edge theoretical and conceptual reflections on the topic. Mobility here is understood as a heterogeneous phenomenon that shapes modern societies and cities by emerging in different dimensions: as physical, social, cultural, and digital mobilities.

This book is open access under a CC BY 4.0 license. This book focuses on the global cycles of energy, water and carbon, which are not only the essentials of our main energy carriers, the fossil fuels, but are also the building blocks of life. The book offers an overview of the basic scientific facts and relationships that are needed to understand today's energy generation and use, how they relate to global climate, the water cycle and other resources, and the complexities of energy policy. Building on the work of the Desertec project, it presents the main technological options that we will have in a world after the "Energiewende" and presents the possible future solutions for a sustainable world. The book is written in an engaging, descriptive style that can be understood by those without specific knowledge of science or economics and allows readers to form their own conclusions. Controversy rages over energy problems, climate change and their possible solutions. Expressions like "climate deniers", "renaissance of nuclear energy", "stop the war on coal", and "Energiewende now" represent a diversity of opinions that divide our society and political leaders. This book shows the reader the whole energy picture and how it is part of the wider global problems of overpopulation and uncontrolled economies in a world of limited resources.

World Development Report 1978

As the American economy surged in the 1990s, economic sociology made great strides as well. Economists and sociologists worked across disciplinary boundaries to study the booming market as both a product and a producer of culture, tracing the correlations they saw between economic and social phenomena. In the process, they debated the methodological issues that arose from their interdisciplinary perspectives. The New Economic Sociology provides an overview of these debates

and assesses the state of the burgeoning discipline. The contributors summarize economic sociology's accomplishments to date, identifying key theoretical problems and opportunities, and formulating strategies for future research in the field. The book opens with an introduction to the main debates and conceptual approaches in economic sociology. Contributor Neil Fligstein suggests that the current resurgence of interest in economic sociology is due to the way it brings together many sociological subdisciplines including the study of markets, households, labor markets, stratification, networks, and culture. Other contributors examine the role of economic phenomena from a network perspective. Ron Burt, for example, demonstrates how social relationships affect competitive dynamics in the marketplace. A third set of chapters addresses the role of gender in economic sociology. In her chapter, Barbara Reskin rethinks conventional notions about discrimination and points out that the law only covers one type of discrimination, while in recent years social scientists have uncovered other forms of hidden discrimination, which must be addressed as well. The *New Economic Sociology* also addresses the problem of economic development and change from a sociological perspective. Alejandro Portes and Margarita Mooney elaborate on one of the key emerging concepts in economic sociology, arguing that social capital—as an attribute of communities and regions—can contribute to economic and social well-being by fostering collaboration and entrepreneurship. The contributors concur that economic action must be interpreted through the cultural understandings that lend it stability and meaning. By rendering these often complex debates accessible, *The New Economic Sociology* makes a significant contribution to this still rapidly developing field, and provides a useful guide for future avenues of research.

Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarao, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work. Contributors include John M. The Second Edition of *Content Analysis: An Introduction to Its Methodology* is a definitive sourcebook of the history and core principles of content analysis as well as an essential resource for present and future studies. The book introduces readers to ways of analyzing meaningful matter such as texts, images, voices – that is, data whose physical manifestations are secondary to the meanings that a particular population of people brings to them. Organized into three parts, the book examines the conceptual and methodological aspects of content analysis and also traces several paths through content analysis protocols. The author has completely revised and updated the Second Edition, integrating new information on computer-aided text analysis. The book also includes a practical guide that incorporates experiences in teaching and how to advise academic and commercial researchers. In addition, Krippendorff clarifies the epistemology and logic of content analysis as well as the methods for achieving its aims. Intended as a textbook for advanced undergraduate and graduate students across the social sciences, *Content Analysis, Second Edition* will also be a valuable resource for practitioners in a variety of disciplines.

Complexity, Security and Civil Society in East Asia offers the latest understanding of complex global problems in the region, including nuclear weapons, urban insecurity, energy, and climate change. Detailed case studies of China, North and South Korea, and Japan demonstrate the importance of civil society and ‘civic diplomacy’ in reaching shared solutions to these problems in East Asia and beyond. Each chapter describes regional civil society initiatives that tackle complex challenges to East Asia’s security. In doing so, the book identifies key pressure points at which civil society can push for constructive changes—especially ones that reduce the North Korean threat to its neighbors. Unusually, this book is both theoretical and practical. *Complexity, Security and Civil Society in East Asia* presents strategies that can be led by civil society and negotiated by its diplomats to realize peace, security, and sustainability worldwide. It shows that networked civic diplomacy offers solutions to these urgent issues that official ‘complex diplomacy’ cannot. By providing a new theoretical framework based on empirical observation, this volume is a must read for diplomats, scholars, students, journalists, activists, and individual readers seeking insight into how to solve the crucial issues of our time.

Thinkers on Education

This book discusses and analyses the dimensions of Turkey's strategic rapprochement with the Eurasian states and institutions since the deterioration of Ankara's relations with its traditional NATO allies. Do these developments signify a major strategic reorientation in Turkish foreign policy? Is Eurasia becoming an alternative geopolitical concept to Europe or the West? Or is this 'pivot to Eurasia' an instrument of the current Turkish government to obtain greater diplomatic leverage? Engaging with these key questions, the contributors explore the geographical, political, economic, military and social dynamics that influence this process, while addressing the questions that arise from the difficulties in reconciling Ankara's strategic priorities with those of other Eurasian countries like Russia, China, Iran and India. Chapters focus on the different aspects of Turkey's improving bilateral relations with the Eurasian states and institutions and consider the possibility of developing a convincing Eurasian alternative for Turkish foreign policy. The book will be useful for researchers in the fields of politics and IR more broadly, and particularly relevant for scholars and students researching Turkish foreign policy and the geopolitics of Eurasia.

The Gutenberg Galaxy catapulted Marshall McLuhan to fame as a media theorist and, in time, a new media prognosticator. Fifty years after its initial publication, this landmark text is more significant than ever before. Readers will be amazed by McLuhan's prescience, unmatched by anyone since, predicting as he did the dramatic technological innovations that have fundamentally changed how we communicate. The Gutenberg Galaxy foresaw the networked, compressed 'global village' that would emerge in the late-twentieth and twenty-first centuries — despite having been written when black-and-white television was ubiquitous. This new edition of The Gutenberg Galaxy celebrates both the centennial of McLuhan's birth and the fifty-year anniversary of the book's publication. A new interior design updates The Gutenberg Galaxy for twenty-first-century readers, while honouring the innovative, avant-garde spirit of the original. This edition also includes new introductory essays that illuminate McLuhan's lasting effect on a variety of scholarly fields and popular culture. A must-read for those who inhabit today's global village, The Gutenberg Galaxy is an indispensable road map for our evolving

communication landscape.

Fanny Duberly (1829-1903) was an adventurous soldier's wife who witnessed the Crimean War and Sepoy Mutiny. Her husband, Captain Henry Duberly, was the paymaster to the 8th Royal Irish Hussars, part of the famed Light Brigade of Balaclava. The published journal of her time in the Crimea: *Journal Kept During the Russian War (1856)* not only includes splendid accounts of what she saw, but also is a good record of all the rumors and gossip of the army. As the only woman at the front-lines, she was the center of much attention. She was told of planned attacks ahead of time, giving her the opportunity to be in a good position to witness them.
