### **My Actions Matter**

How do you make taxpayers comply? This ethnography offers a vivid, yet nuanced account of knowledge making at one of Sweden's most esteemed bureaucracies – the Swedish Tax Agency. In its aim to collect taxes and minimize tax faults, the Agency mediates the application of tax law to ensure compliance and maintain legitimacy in society. This volume follows one risk assessment project's passage through the Agency, from its inception, through the research phase, in discussions with management to its final abandonment. With its fiscal anthropological approach, *Shaping Taxpayers* reveals how diverse knowledge claims – legal, economic, cultural – compete to shape taxpayer behaviour.

### **Values Deliberation and Collective Action**

How can you effectively stand up for your values when pressured by your boss, customers, or shareholders to do the opposite? Drawing on actual business experiences as well as on social science research, Babson College business educator and consultant Mary Gentile challenges the assumptions about business ethics at companies and business schools. She gives business leaders, managers, and students the tools not just to recognize what is right, but also to ensure that the right things happen. The book is inspired by a program Gentile launched at the

Aspen Institute with Yale School of Management, and now housed at Babson College, with pilot programs in over one hundred schools and organizations, including INSEAD and MIT Sloan School of Management. She explains why past attempts at preparing business leaders to act ethically too often failed, arguing that the issue isn't distinguishing what is right or wrong, but knowing how to act on your values despite opposing pressure. Through research-based advice, practical exercises, and scripts for handling a wide range of ethical dilemmas, *Gentle* empowers business leaders with the skills to voice and act on their values, and align their professional path with their principles. *Giving Voice to Values* is an engaging, innovative, and useful guide that is essential reading for anyone in business.

## **A Field Guide to Good Decisions**

What does it mean in practice to be a values-based leader? When faced with real situations, how can you be your best self and create best teams—while also being a best partner with customers and vendors, a best investment for your stakeholders, and a best citizen making a difference in the world? It's a tall order, but these are the expectations for world-class organizations today. In his bestselling book From

Values to Action, Harry Kraemer showed how self-reflection, balance, true self-confidence, and genuine humility are the traits of today's most effective leaders. In *Becoming the Best*, his highly anticipated follow-up, Kraemer reveals how, in practical terms, anyone can apply these principles to become a values-based leader and to help create values-based organizations. Drawing on his own experiences as the former CEO and chairman of Baxter International, as well as those of other notable leaders and organizations, Kraemer lays out a pathway for understanding the principles and putting them into practice, showing specifically how to:

- Use self-reflection to become your "best self" as you lead yourself and others more effectively
- Create a "best team" that understands and appreciates what they're doing, and why
- Forge "best partnerships" through win/win collaboration with vendors and customers that enhance the end user's experience
- Support the mission, vision, and values of the organization to generate returns that distinguish a "best investment"
- Make a difference in the world beyond the organization by becoming a "best citizen"

Powerful case studies from Campbell's Soup, Ernst & Young, Target, Northern Trust, and many others demonstrate the four principles of values-based leadership in action and show how thinking beyond the corporation can trigger positive outcomes for both the company and the world. Regardless of level or job title, individuals can make a difference in their organization and beyond by embodying the essential traits of a great leader. *Becoming the Best* offers a definitive, actionable guide to show anyone how to apply in practice the principles of values-based leadership personally and professionally, making it an

Why stigmatizing and confining a large segment of our population should be unacceptable to all Americans. The United States, home to five percent of the world's population, now houses twenty-five percent of the world's prison inmates. Our incarceration rate—at 714 per 100,000 residents and rising—is almost forty percent greater than our nearest competitors (the Bahamas, Belarus, and Russia). More pointedly, it is 6.2 times the Canadian rate and 12.3 times the rate in Japan. Economist Glenn Loury argues that this extraordinary mass incarceration is not a response to rising crime rates or a proud success of social policy. Instead, it is the product of a generation-old collective decision to become a more punitive society. He connects this policy to our history of racial oppression, showing that the punitive turn in American politics and culture emerged in the post-civil rights years and has today become the main vehicle for the reproduction of racial hierarchies. Whatever the explanation, Loury argues, the uncontroversial fact is that changes in our criminal justice system since the 1970s have created a nether class of

Moreover, conservatives and liberals agree that the growth in our prison population has long passed the point of diminishing returns. ### **Ethics of Big Data**

Two world-renowned global activists explore the rise of grassroots globalists -- citizens all over the world who are taking responsibility to build a more peaceful, harmonious, and sustainable future -- in this wide-ranging dialogue. They discuss their own backgrounds and what led them individually to activism on a world-wide scale. At the same time, they provide encouragement and concrete information for the millions of other concerned citizens who want to make a difference. A wide variety of issues that are now gaining greater recognition at all levels of society are explored, including sustainable development, economic justice, respect for indigenous peoples and their traditional lands and resources, democratising politics and international institutions, making corporations accountable, and conserving the Earth's bio-diversity, water, air quality, and climate.

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the hourlong Netflix special Brené Brown: The Call to Courage! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times

bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, “One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It’s learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It’s why we’re here.” Whether you’ve read *Daring Greatly* and *Rising Strong* or you’re new to Brené Brown’s work, this book is for anyone who wants to step up and into brave leadership.

The Social (Re)Production of Architecture brings the debates of the ‘right to the city’ into today’s context of ecological, economic and social crises. Building on the 1970s’ discussions about the ‘production of space’, which French sociologist Henri Lefebvre considered a civic right, the authors question who has the right to make space, and explore the kinds of relations that are produced in the process. In the emerging post-capitalist era, this book addresses urgent social and ecological imperatives for change and opens up questions around architecture’s engagement with new forms of organization and practice. The book asks what (new) kinds of ‘social’ can architecture (re)produce, and what kinds of politics, values and actions are needed. The book features 24 interdisciplinary essays written by leading

This book presents a fresh examination of the values and principles that inform EU foreign policy, exploring the implications of these values and principles on the construction of European Union identity today. The authors show how current debates on European Union foreign policy and on European identity tend to be kept separated, as if the process of identity formation had only an internal dimension or it was not related to the external behaviour of an international actor. Conceiving EU foreign policy in its broadest context as a set of political actions that are regarded by external actors as 'EU' actions, the book focuses on both Pillar I and Pillar II policies, involving EU and member state actions and material political actions and less material ones such as speech acts. Adopting a multidisciplinary perspective and drawing on political science, political economy, sociology, environmental science and women's studies, this book will be of great interest to students and scholars of European studies and politics.

"Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths-authenticity, persistence, kindness, gratitude, hope, humor, and so on-

each of which exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life.

### **Summary: From Values to Action**

This volume provides a collection of critical new perspectives on social capital theory by examining how social values, power relationships, and social identity

interact with social capital. This book seeks to extend this theory into what have been largely under-investigated domains, and, at the same time, address long-standing, classic questions in the literature concerning the forms, determinants, and consequences of social capital. Social capital can be understood in terms of social norms and networks. It manifests itself in patterns of trust, reciprocity, and cooperation. The authors argue that the degree to which and the different ways in which people exhibit these distinctively social behaviours depend on how norms and networks elicit their values, reflect power relationships, and draw on their social identities. This volume accordingly adopts a variety of different concepts and measures that incorporate the variety of contextually-specific factors that operate on social capital formation. In addition, it adopts an interdisciplinary outlook that combines a wide range of social science disciplines and methods of social research. Our objective is to challenge standard rationality theory explanations of norms and networks which overlook the role of values, power, and identity. This volume appeals to researchers and students in multiple social sciences, including economics, sociology, political science, social psychology, history, public policy, and international relations, that employ social capital concepts and methods in their research. It can be seen as a set of new extensions of social capital theory in connection with its themes of social values, power, and identity that would advance the scholarly literature on social norms and networks and their impact on social change and public welfare.

The book is written by bestselling author Harry Kraemer, former Chairman and CEO of Baxter International and currently a professor of management and strategy at Northwestern University's Kellogg School of Management, where he was a Professor of the Year. Kraemer uses personal stories and insights from others to help readers discover the dissonance between what they say is most important and where they actually devote their time. This is an eye-opener for most people, uncovering the obstacles to leading a value-based life. In *Your 168*, you will learn how to make changes and build new habits that put your values first by:

- Using self-reflection to identify what matters most and become more aware of how you spend your time
- Re-evaluating priorities such as career, family, health, recreation, spirituality, and making a difference
- Avoiding unpleasant "surprises" and "hitting the brick wall"
- Experiencing better balance in real time amid shifting priorities—personally and professionally

Fans of Kraemer's previous books on values-based leadership will embrace this new release - *Your 168: Finding Purpose and Satisfaction in a Values-Based Life*. The book provides actionable advice, filled with tips on how to live a life of meaning and experience a greater sense of purpose. Everyone will feel inspired to make lasting change. All of Harry's proceeds from the book sales are donated to the One Acre Fund in Africa.

Moral and citizenship education are again at the forefront of educational attention with the recent governmental announcements about revisions to the National Curriculum frameworks to 2000 and beyond. This book addresses some of the central issues in moral and citizenship education facing teachers today, embedding practical considerations in a theoretical context and reviewing teaching, learning and assessment strategies. It draws extensively on research but is written in a clear, accessible style. Citizenship and Moral Education examines the key concepts and provides an up-to-date overview of policy, particularly addressing: theoretical issues, aims and approaches in relation to moral and citizenship education in a pluralist society the contributions of the curriculum, extra-curricular activities and the school ethos to citizenship and moral education in school teaching strategies, materials, pupil assessment and school evaluation. The book also focuses on key professional and personal issues for teachers in undertaking moral citizenship education.

Giving Voice to Values as a Professional Physician provides students with the theoretical background and practical applications for acting on their values in situations of ethical conflict. It is the first medical ethics book that utilizes the Giving Voice to Values methodology to instruct students in medical ethics and professionalism. In doing so, it shifts the focus of ethics education from intellectually examining ethical theories and conflicts to emphasizing moral action. Each section of the book explains how moral decision-making and action can be implemented in the healthcare arena. Medical ethics cases are provided throughout in order to assist students in giving voice to their values and developing skills for professional action. The Giving Voice to Values methodology, and the cases in this book, do not focus on the big questions of academic ethics, but rather on the ethics of the everyday, even if the challenges presented are

difficult. In other words, the ethical questions students will have to face, in this book and in medical education and practice, are about how to interact with others, whether they be patients or colleagues, who might have different ethical positions. The book provides a unique guide for professional identity formation and the teaching of ethics in medical schools.
