Ethnography by Design

The International Bestseller Is there anything more cut-throat than global politics? Wherever you turn – Europe, Russia, China, Korea, Syria, the Middle East –

we are living in a time of global geopolitical power plays. Once an insider to this closed world, Pedro Banos reveals that however it might be smoothed over by the PR of political diplomacy, the world of geopolitics is one of war and conflict by strategic means, where countries have sought dominion and power over their rivals since the dawn of time. Banos presents this high-stakes game as a series of 22 universal rules on how to act and exert influence in the international sphere. Each principle is contextualised in both classical and modern history, from Bismarck to Kissinger, but also related to the current world of Trump, Putin and Xi Jinping. With titles like 'Kicking Away the Ladder', 'The Tower of Champagne Glasses', 'The Madman', and 'The Mule and the Saddlebags', How They Rule the World is a practical set of rules for engagement that can be enjoyed by anyone. Written with the philosophic, aphoristic timelessness of a von Bulow, Sun Tzu or Machiavelli, Banos has created an utterly gripping manual on the secrets of how strategic power really works.

Choices Pre-Intermediate Students' Book for Mylab Pack

Finding all the birds in Texas can be a lifetime pursuit. Basic Texas Birds, an easy-to-use field guide, will help you identify over 180 species of birds that are found across the state, including a selection of the rarer "Texas specialties" that draw birders to Texas from around the world. These are the birds that form the basis of a birder's life list for Texas. Basic Texas Birds is organized by bird families to aid in identifying any bird you see in the wild. It is loaded with resources, including: 200 full-color, close-up photos of the birds State-of-the-art range maps—the most accurate of any currently available—that show each species' distribution within the state Up-to-date species accounts that provide a wealth of current and historical information, including each bird's appearance, habitat, status, and distribution, and that also identify similar species A glossary of terms used in bird identification A list of selected readings for learning more about birds found in Texas The Texas Ornithological Society's list of birds documented in Texas Much more convenient for identifying common birds than a comprehensive state or national field guide, Basic Texas Birds is a must-have resource for both beginning and experienced birders.

Longman Active Study Dictionary. Per Le Scuole Superiori. Con CD-ROM

Globalization, it seems, has propelled the world's uber-wealthy to new heights of power and money, with tremendous repercussions for the other 99.9 percent of us. At a time when neoliberalism has propelled the world into a new Gilded Age, with rising inequality everywhere, an aggressive class war being waged by the wealthy, and billionaires inserting themselves bluntly into the political arena, understanding the behavior and spatiality of the super-rich has acquired a pressing urgency. This volume offers a richly textured suite of essays concerning how the super-rich have restructured local places, transforming landscapes as varied as London and Kentucky, Ireland and St. Barts, as well as domains as varied as art, thoroughbred horses, and housing. ð Barney Warf, University of Kansas, US The world's super-rich, made up of just 11 million people, have access to about US\$42.0 trillion of wealth. These are people who each have a spare million of 'liquid' wealth.

Their wealth is roughly equal to two thirds of global GDP. They own most of everything. As the editor of this books states " . . . library shelves and the pages of journals remain largely devoid of geographical work on the super-rich " a startling lacuna this volume sets out to fill". The super-rich now own most of the planet. During the last year their share fell slightly. Times may be changing. Now is the time to begin to study the super-rich in detail, especially if you are worried about where all the wealth has gone." " Danny Dorling, University of Sheffield, UK This timely and path-breaking book brings together a group of distinguished and emerging international scholars to critically consider the geographical implications of the world's super-rich, a privileged yet remarkably overlooked group. Emerging from this unique collection is an enlightening picture of the influence of the super-rich over a diverse range of affairs, extending from the shape of urban and rural landscapes to the future of art history. By concentrating on those at the apex of the economic pyramid, this book provides valuable insights to the institutions, practices and cultural values of our society, as well as allowing us a more comprehensive view of the consequences of global capitalism. Presenting case studies from across the globe " from Singapore to St Barts, London to Lexington " the spatial and cultural span of the book is wide-ranging and diverse. This truly unique book will prove a fascinating read for academics, researchers and students in the fields of geography, regional and urban studies, sociology, political science and development studies.

Origins of Human Communication

Intellectual Disability

This Manual contains the most current and authoritative information and knowledge on intellectual disability, including best practice guidelines on diagnosing and classifying intellectual disability and developing a system of supports for people living with an intellectual disability. Written by a committee of 18 experts, *Intellectual Disability: Definition, Classification, and Systems of Supports* (11th edition) is based on seven years of work on: (1) a synthesis of current information and best practices regarding intellectual disability; (2) numerous reviews and critiques of the 10th edition of the AAIDD definition manual; and (3) feedback from the field regarding a series of articles published by the Committee. This is the first official AAIDD definition manual with the terminology "Intellectual Disability" (formerly mental retardation).

Atti e memorie dell'Accademia toscana di scienze e lettere «La Colombaria»

Computer-Based Medical Consultations: MYCIN focuses on MYCIN, a novel computer-based expert system designed to assist physicians with clinical decisions concerning the selection of appropriate therapy for patients with infections. It discusses medical computing, artificial intelligence, and the clinical problem areas for which the MYCIN program is designed, and it describes in detail how the MYCIN program helps physicians in making decisions. Comprised of seven chapters, this volume begins with an overview of MYCIN and the criteria used in its design. It

then discusses data structures and control structures in the context of prior work regarding rule-based problem-solving, inferential model building and inexact reasoning in medicine. The book also explores MYCIN'S ability to answer questions with respect to its knowledge base and the details of a specific consultation, evaluation and future extensions of the MYCIN system, the limitations and accomplishments of MYCIN, and its contributions in artificial intelligence and computer-based medical decision making. This book is a valuable source of information for computer scientists and members of the medical community.

New Inspiration

The story you are about to read is about a young girl named SALEENAH who has everything a girl could possibly want or need, born in a family who has it ALL and parents who have their own law firm, the best in their town. Saleenah's parents have set up for her, in the event of their death, to inherit the estate. Saleenah's father also sets up for her to temporarily go to a girls shelter to show her that things don't always come on a silver platter. One day in an instant everything is turned upside down when a storm hits the family's Victorian home and the people dear to Saleenah are taken away forever. How will Saleenah cope? What will happen to Saleenah now? What will her future be? This story takes on a special meaning today, that life can be turned upside down in an instant. Showing the importance of families and that we can come out on top. I hope this story reaches the heart of those who read it.

How They Rule the World

Cruising the Library offers a highly innovative analysis of the history of sexuality and categories of sexual perversion through a critical examination of the Library of Congress and its cataloging practices. Taking the publication of Eve Kosofsky Sedgwick's *Epistemologies of the Closet* as emblematic of the Library's inability to account for sexual difference, Melissa Adler embarks upon a detailed critique of how cataloging systems have delimited and proscribed expressions of gender, sexuality, ethnicity, and race in a manner that mirrors psychiatric and sociological attempts to pathologize non-normative sexual practices and civil subjects. Taking up a parallel analysis, Adler utilizes Roderick A. Ferguson's *Aberrations in Black* as another example of how the Library of Congress fails to account for, and thereby "buries," difference. She examines the physical space of the Library as one that encourages forms of governmentality as theorized by Michel Foucault while also allowing for its utopian possibilities. Finally, she offers a brief but highly illuminating history of the Delta Collection. Likely established before the turn of the twentieth century and active until its gradual dissolution in the 1960s, the Delta Collection was a secret archive within the Library of Congress that housed materials confiscated by the United States Post Office and other federal agencies. These were materials deemed too obscene for public dissemination or general access. Adler reveals how the Delta Collection was used to regulate difference and squelch dissent in the McCarthy era while also linking it to evolving understandings of so-called perversion in the scientific study of sexual difference. Sophisticated, engrossing, and highly readable, *Cruising the Library* provides us with a critical understanding of library science, an alternative view of discourses around the history of sexuality, and an analysis of the relationship between governmentality

and the cataloging of research and information—as well as categories of difference—in American culture.

Grammar and Vocabulary for the Real World. Per Le Scuole Superiori

The Expressive Body in Life, Art, and Therapy

Ethnography by Design, unlike many investigations into how ethnography can be done, focuses on the benefits of sustained collaboration across projects to ethnographic enquiry, and the possibilities of experimental co-design as part of field research. The book translates specifically scenic design practices, which include processes like speculation, materialization, and iteration, and applies them to ethnographic inquiry, emphasizing both the value of design studio processes and "designed" field encounters. The authors make it clear that design studio practices allow ethnographers to ask and develop very different questions within their own and others' research and thus, design also offers a framework for shaping the conditions of encounter in ways that make anthropological suppositions tangible and visually apparent. Written by two anthropologists and a designer, and based on their experience of their collective endeavours during three projects, Luke Cantarella, Christine Hegel, and George E. Marcus examine their works as a way to continue a broader inquiry into what the practice of ethnography can be in the twenty-first century, and how any project distinctively moves beyond standard perspectives through its crafted modes of participation and engagement.

Zero Quality Control

Stephani Byzantini de Urbibus restituit, supplevit, ac Latina versione et commentario illustravit Abrahamus Berkelius. Accedunt collectae ab Jacobo Gronovio variae lectiones

After fifteen years of reconstruction in a relatively peaceful environment spanning the years 1990 to 2004, Lebanon has experienced successive violent political

events resulting from complex entangled internal and external struggles. The Syrian crisis and its political, economic and demographic consequences on Lebanon have increased these tensions. This atlas sheds light on these new challenges and adds new data that complete the analyses already published in the Atlas du Liban. Territoires et société (Atlas of Lebanon. Territories and Society) released in 2007 by the same research team. Some of its components are included in this edition. Beyond the international regional crisis and the population movements, it takes into account Lebanon's socio-economic dimensions, the environmental issues linked to uncontrolled urbanization and to natural risks, as well as conflicts due to local territorial management. This atlas is the result of a collaborative endeavor between French and Lebanese researchers. It uses a geographical approach that puts in the foreground a spatial analysis of social and natural phenomena. Public sources are scarce in Lebanon, especially at the local scale. They are sometimes less reliable and difficult to access. It is particularly the case for the Lebanese census data, conversely data are abundantly available on the refugees population, which is less known than the population of refugees. International data help compare Lebanon to its neighbors. Thematic data produced by some ministries are helpful to provide a detailed view regarding specific domains. Analyses processed on aerial and satellite images have produced essential data on urbanization and environment. Local thematic fieldwork surveys have provided additional data. The book consists of seven chapters. The first one deals with the territorial state-building seen in the light of regional geopolitics, and emphasizes internal violence and the reemergence of militias and armed groups that fight each other and the state army. Lebanon is once again perceived as a territory divided between multiple allegiances. The second chapter is devoted to the analysis of population dynamics, despite the lack of reliable data whose sources are subject to discussion. It includes analyses of internal population flows, the Lebanese diaspora, and the assessment of Syrian refugees' influx. The third chapter shows the fragility of the Lebanese economic model. Its dependency on foreign investments and on

Wolf Quest: Temptation of the Wolf: Wolf Quest, #1

Where did "democracy" come from, and what was its original form and meaning? Here Josiah Ober shows that this "power of the people" crystallized in a revolutionary uprising by the ordinary citizens of Athens in 508-507 B.C. He then examines the consequences of the development of direct democracy for upper-and lower-class citizens, for dissident Athenian intellectuals, and for those who were denied citizenship under the new regime (women, slaves, resident foreigners), as well as for the general development of Greek history. When the citizens suddenly took power into their own hands, they changed the cultural and social landscape of Greece, thereby helping to inaugurate the Classical Era. Democracy led to fundamental adjustments in the basic structures of Athenian society, altered the forms and direction of political thinking, and sparked a series of dramatic reorientations in international relations. It quickly made Athens into the most powerful Greek city-state, but it also fatally undermined the traditional Greek rules of warfare. It stimulated the development of the Western tradition of political theorizing and encouraged a new conception of justice that has striking parallels to contemporary theories of rights. But Athenians never embraced the notions of inherency and inalienability that have placed the concept of rights at the center of

modern political thought. Thus the play of power that constituted life in democratic Athens is revealed as at once strangely familiar and desperately foreign, and the values sustaining the Athenian political community as simultaneously admirable and terrifying.

The Athenian Revolution

In recent years there has been a considerable effort in some transnational organizations and institutions to confront a crisis of legitimacy by promising more accountability and openness. This volume takes as its central focus the role of accountability in democratic governance, and attempts to position a broad understanding of the notion of accountability within the overall context of the evolving political system of governance in Europe and in particular of the European Union. Bringing together new work by some of the leading scholars in the field, this volume considers the relationship between accountability and a wide range of other themes in European governance such as problems of representation, transparency, bureaucracy, and transnational relations. The volume also deals with the role of accountability in multi-level governance, and its relationship to both direct democracy and civil society. This book was published as a special issue of West European Politics.

Drawing on her extensive experience in expressive arts therapy, Daria Halprin presents a unique approach to healing through movement and art. She describes the body as the container of one's entire life experience and movement as a language that expresses and reveals our deepest struggles and creative potentials. Interweaving artistic and psychological processes, she offers a philosophy and methodology that invites the reader to consider the transformational capacity of the arts. In this essential resource for anyone interested in the integration of psychotherapy and the arts, Halprin also presents case studies and a selection of exercises that she has evolved over her career and practised at the Tamalpa Institute for over twenty-five years.

Philosophy Of Physics

How does the mind experience the sacred? What biological mechanisms are involved in mystical states and trances? Is there a neurological basis for patterns in comparative religions? Does religion have an evolutionary function? This pathbreaking work by two leading medical researchers explores the neurophysiology of religious experience. Building on an explanation of the basic structure of the brain, the authors focus on parts most relevant to human experience, emotion, and cognition. On this basis, they plot how the brain is involved in mystical experiences. Successive chapters apply this scheme to mythmaking, ritual and liturgy, meditation, near-death experiences, and theology itself. Anchored in such research, the authors also sketch the implications of their work for philosophy, science, theology, and the future of religion.

Mystical Mind

Gli Este a Ferrara

A leading expert on evolution and communication presents an empirically based theory of the evolutionary origins of human communication that challenges the dominant Chomskian view. Human communication is grounded in fundamentally cooperative, even shared, intentions. In this original and provocative account of the evolutionary origins of human communication, Michael Tomasello connects the fundamentally cooperative structure of human communication (initially discovered by Paul Grice) to the especially cooperative structure of human (as opposed to other primate) social interaction. Tomasello argues that human cooperative communication rests on a psychological infrastructure of shared intentionality

(joint attention, common ground), evolved originally for collaboration and culture more generally. The basic motives of the infrastructure are helping and sharing: humans communicate to request help, inform others of things helpfully, and share attitudes as a way of bonding within the cultural group. These cooperative motives each created different functional pressures for conventionalizing grammatical constructions. Requesting help in the immediate you-and-me and here-and-now, for example, required very little grammar, but informing and sharing required increasingly complex grammatical devices. Drawing on empirical research into gestural and vocal communication by great apes and human infants (much of it conducted by his own research team), Tomasello argues further that humans' cooperative communication emerged first in the natural gestures of pointing and pantomiming. Conventional communication, first gestural and then vocal, evolved only after humans already possessed these natural gestures and their shared intentionality infrastructure along with skills of cultural learning for creating and passing along jointly understood communicative conventions. Challenging the Chomskian view that linguistic knowledge is innate, Tomasello proposes instead that the most fundamental aspects of uniquely human communication are biological adaptations for cooperative social interaction in general and that the purely linguistic dimensions of human communication are cultural conventions and constructions created by and passed along within particular cultural groups.

Lingua Latina Pars 1

The Latin course is written entirely in Latin. It consists of two parts: I: Familia Romana -- the fundamental or elementary course. II: Roma Aeterna -- the advanced course, with Indices covering both parts. The direct method is based on the inductive principle of learning. In the text every sentence is intelligible per se, or self-explanatory, because the meaning and function of all new words and grammatical forms are made clear by the context in which they occur, or if necessary, by illustrations or marginal notes using vocabulary already learned. This demands a carefully graded text, but in order to make learning efficient the content should stimulate interest and curiosity and make it easy for the reader to visualise the scenes and situations described. To meet these demands the chapters of Lingua Latina I form a continuous narrative, a sort of Latin novel, which captivates the students so that they look forward to reading the continuation of the story. While reading this story and learning facts about the Roman life and traditions, the students pick up the vocabulary and grammar that will enable them to go on, in Part II, to read a representative selection of Latin literature, both prose and poetry. Here, too, all new words and structures, if not immediately intelligible from the context, are explained by marginal notes or illustrations. In addition, factual information is given in the margin. Part I covers the essentials of Latin grammar and introduces a basic vocabulary of some 1600 words. The 35 chapters form a sequence of scenes and incidents from the life of a Roman family in the second century A.D. Each chapter is divided into 3 or 4 lessons (lectiones) and consists of several text pages followed by a section on grammar, three exercises, and a list of new words. At the end of the volume there is a survey of inflexions, a Roman calendar, and alphabetical word-list and a grammatical index.

My Ten Years' Imprisonment

Fields of Gold critically examines the history, ideas, and political struggles surrounding the financialization of farmland. In particular, Madeleine Fairbairn focuses on developments in two of the most popular investment locations, the US and Brazil, looking at the implications of financiers' acquisition of land and control over resources for rural livelihoods and economic justice. At the heart of Fields of Gold is a tension between efforts to transform farmland into a new financial asset class, and land's physical and social properties, which frequently obstruct that transformation. But what makes the book unique among the growing body of work on the global land grab is Fairbairn's interest in those acquiring land, rather than those affected by land acquisitions. Fairbairn's work sheds ethnographic light on the actors and relationships—from Iowa to Manhattan to São Paulo—that have helped to turn land into an attractive financial asset class.
