### **Armored Cav**

Detective Sergeant James Henderson of London's Metropolitan Police Murder Investigation Team is no ordinary police officer. His remarkable gut instincts and relentless detective work have put him on a three-year fast track to becoming an inspector. When the murder of barrister Maria Curzon-Whyte lands in his lap, he finds himself drawn back into the insidious world of London's privileged elite where men like James's father possess wealth and power enough to hold the law in contempt. As James navigates the promiscuous, secretive and corrupt spheres of the rich, the murderer strikes again. Soon James begins to fear that these crimes lead dangerously close to his own heart and home. And now, he risks losing everything he's made of his life unless he can expose the sordid truths that have bred this bitter legacy."

### **The Last Confession of Autumn Casterly**

Going behind the scenes of an armored cavalry regiment, an insider's view includes photographs, illustrations, and diagrams of tanks, helicopters, and artillery systems, interviews with high-ranking officers, and future roles the armored cavalry might play. Original.

“A book or collection of writings constituting the sacred text of a religion.” —The American Heritage® Dictionary of the English Language, Fourth Edition For thousands of years, we have been told that God was a man. Then someone reminded us of when God was a woman. Now we have a reference for the sensible folk who have always felt that it takes two. If you have ever thought there was more to religion than ancient rituals performed for reasons unknown, this book will show you exactly what you have been looking for. If you have already come to the realization that Wicca is the religion for you, this book will help fill those many blanks that have been left by other books. Author A.J. Drew makes no attempt to dictate religious dogma or routine. He is quick to point out that the title does not start with the word the. He illustrates the many issues a person’s religion should address and shows how he has been able to find answers to those issues through the practice of a modern religion that was based on some of the oldest principles of the ancient world. A Wiccan Bible takes you through the journey of life in three stages: Maiden and Master: Creation, Wiccaning, and Self-dedication. Mother and Father: Initiation, Handfasting/Handparting, and the Wheel of the Year. Crone and Sage: Community, the world, and death. Mythology and science converge as the author details a life’s journey into a religion with both old world ritual and new world science, fusing both into a creation myth which satisfies not only mind, but soul as well. A Wiccan Bible not only shows a religious path filled with joy, but one that offers the ability to accept and manage sorrow. It is filled with ritual and with the reasons why ritual is fulfilling, rewarding, and a necessary part of everyday life. As A.J. addresses

each issue, he demonstrates not only how he found the solutions in Wicca, and the many ways in which science and magick have helped him to do so. A Wiccan Bible also contains select recipes that the author has collected, including mixtures for incense, oils, and baths.

Electric power systems worldwide face radical transformation with the need to decarbonise electricity supply, replace ageing assets and harness new information and communication technologies (ICT). The Smart Grid uses advanced ICT to control next generation power systems reliably and efficiently. This authoritative guide demonstrates the importance of the Smart Grid and shows how ICT will extend beyond transmission voltages to distribution networks and customer-level operation through Smart Meters and Smart Homes. Smart Grid Technology and Applications: Clearly unravels the evolving Smart Grid concept with extensive illustrations and practical examples. Describes the spectrum of key enabling technologies required for the realisation of the Smart Grid with worked examples to illustrate the applications. Enables readers to engage with the immediate development of the power system and take part in the debate over the future Smart Grid. Introduces the constituent topics from first principles, assuming only a basic knowledge of mathematics, circuits and power systems. Brings together the expertise of a highly experienced and international

author team from the UK, Sri Lanka, China and Japan. Electrical, electronics and computer engineering researchers, practitioners and consultants working in inter-disciplinary Smart Grid RD&D will significantly enhance their knowledge through this reference. The tutorial style will greatly benefit final year undergraduate and master's students as the curriculum increasingly focuses on the breadth of technologies that contribute to Smart Grid realisation.

Sun Ra, Brian Eno, Lee Perry, Kate Bush, Kraftwerk, Aphex Twin, Ryuichi Sakamoto and Brian Wilson are interviewed in this extraordinary work of sonic history. It travels from the rainforests of Amazonas to virtual Las Vegas; from David Lynch's dream house high in the Hollywood Hills to the megalopolis of Tokyo. Ocean of Sound begins in 1889 at the Paris exposition when Debussy first heard Javanese music performed. An ethereal culture developed in response to the intangibility of 20th century communications. Author of Rap Attack 3 and Exotica, David Toop has in Ocean of Sound written an exhilarating, path-breaking account of ambient sound.

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of

America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

### **The Anarchist Cookbook**

This book presents the combined proceedings of the 7th International Conference on Computer Science and its Applications (CSA-15) and the International Conference on Ubiquitous Information Technologies and Applications (CUTE 2015), both held in Cebu, Philippines, December 15 - 17, 2015. The aim of these two meetings was to promote discussion and interaction among academics, researchers and professionals in the field of computer science covering topics including mobile computing, security and trust management, multimedia systems and devices, networks and communications, databases and data mining, and ubiquitous computing technologies such as ubiquitous communication and networking, ubiquitous software technology, ubiquitous systems and applications, security and privacy. These proceedings reflect the state-of-the-art in the development of computational methods, numerical simulations, error and uncertainty analysis and novel applications of new processing techniques in engineering, science, and other disciplines related to computer science.

## **Tongues**

The book is intended for all those who are interested in application problems related to dynamical systems. It provides an overview of recent findings on dynamical systems in the broadest sense. Divided into 46 contributed chapters, it addresses a diverse range of problems. The issues discussed include: Finite Element Analysis of optomechatronic choppers with rotational shafts; computational based constrained dynamics generation for a model of a crane with compliant support; model of a kinetic energy recuperation system for city buses; energy accumulation in mechanical resonance; hysteretic properties of shell dampers; modeling a water hammer with quasi-steady and unsteady friction in viscoelastic conduits; application of time-frequency methods for the assessment of gas metal arc welding conditions; non-linear modeling of the human body's dynamic load; experimental evaluation of mathematical and artificial neural network modeling for energy storage systems; interaction of bridge cables and wake in vortex-induced vibrations; and the Sommerfeld effect in a single DOF spring-mass-damper system with non-ideal excitation.

held in Pori, Finland. The text serves as a multi-disciplinary resource for information on the research, development and applications of all topics related to e-Learning. The first half of the book discusses theories, paradigms and their applications in academia and industry. The last half of the book examines learning environments, design issues and collaboration among the corporate, governmental and academic sectors. With academic and professional contributors, "E-Training Practices for Professional Organizations" reflects the multi-faceted and exciting nature of e-training studies. This volume presents the balanced view of past developments and current research necessary to truly reach the potential of this burgeoning field.

Reducing the size of a coherently grown semiconductor cluster in all three directions of space to a value below the de Broglie wavelength of a charge carrier leads to complete quantization of the energy levels, density of states, etc. Such "quantum dots" are more similar to giant atoms in a dielectric cage than to classical solids or semiconductors showing a dispersion of energy as a function of wavevector. Their electronic and optical properties depend strongly on their size and shape, i.e. on their geometry. By designing the geometry by controlling the growth of QDs, absolutely novel possibilities for material design leading to novel devices are opened. This multiauthor book written by world-wide recognized leaders of their particular fields and edited

by the recipient of the Max-Born Award and Medal 2006 Professor Dieter Bimberg reports on the state of the art of the growing of quantum dots, the theory of self-organised growth, the theory of electronic and excitonic states, optical properties and transport in a variety of materials. It covers the subject from the early work beginning of the 1990s up to 2006. The topics addressed in the book are the focus of research in all leading semiconductor and optoelectronic device laboratories of the world.

Porter's Reaper Death is a minor inconvenience in the path to true love. When the God of the Underworld sends Alstair back to the Academy to help pick out a new headmaster, he doesn't mention he put Alstair in for the job. Angered but willing to keep his word, Alstair discovers the headmaster position comes with more knots of deception than a sailor's rope. Porter Exton had a crush on Alstair. He'd watched Alstair train Elijah through the window and had spent more than one night dreaming of the Reaper. However, dreams were set aside in order to discover the truth about his death and if the man who killed him is responsible for the other deaths at the school. Two men with different backgrounds need to discover what they have in common if they hope to save themselves from plotting gods, egomaniacs and possible killers. Temple's Touch Sometimes true love is right in front of you. Madison Archer dreams of the day he can claim Temple as his mate. However, when Temple heads off to school Maddie worries he'll be forgotten among Temple's new friends. Maybe a half wolf can't understand the bond between mates. Basal Cell Carcinoma: Advances in Treatment and Research provides a comprehensive overview of evidence-based treatment approaches for the most common cancer worldwide - basal cell carcinoma. The first part of this book details the epidemiology, risk factors, pathophysiology, and different histologic subtypes of basal cell carcinoma highlighted with high-resolution histopathology images. The second part of the book provides an in-depth review of different treatment modalities including topical therapy, local immunotherapy with interferon, cryotherapy, electrodesiccation and curettage, radiotherapy, and surgical approaches with Mohs micrographic surgery, head and neck surgery, and oculoplastic surgery. The final part of book highlights the utilization of innovative technology such as photodynamic therapy and laser for the treatment of basal cell carcinoma while providing excellent cosmetic outcome as well as emerging systemic therapeutic options utilizing hedgehog pathway inhibitors and immunotherapy for the difficult-to-treat disease state, advanced basal cell carcinoma. Meant for a multi-disciplinary audience of dermatologists, Mohs Surgeons, oncologists, head and neck surgeons, oculoplastic surgeons, radiation oncologists, this book serves as an informative practical guide for physicians, mid-level providers and trainees. Basal Cell Carcinoma, is edited and written by leaders with expertise in cutaneous oncology, pathology, dermatology, Mohs micrographic surgery, plastic surgery, and many more specialties.

## **The Red Labyrinth**

This is the first book, after J. E. Sandys, to cover the multiform field of “ancient scholarship” from the beginnings to the fall of Byzantium. It is worth underlining the benefits of a work with multiple expert voices in a field so complex. The book is based on the four historiographical chapters of Brill's Companion to Ancient Greek Scholarship (2015), which have been updated and rethought.

## **Dark Breaks the Dawn**

On her eighteenth birthday, Princess Evelayn of Eadrolan, the Light Kingdom, can finally access the full range of her magical powers. The light looks brighter, the air is sharper, and the energy she can draw when fighting feels almost limitless. But while her mother, the queen, remains busy at the war front, in the Dark Kingdom of Dorjhalon, the corrupt king is plotting. King Bain wants control of both kingdoms, and his plan will fling Evelayn into the throne much sooner than she expected. In order to defeat Bain and his sons, Evelayn will quickly have to come into her ability to shapeshift, and rely on the alluring Lord Tanvir. But not everyone is what they seem, and the balance between the Light and Dark comes at a steep price. In the first book of a remarkable duology, Sara B. Larson sets the stage for her reimagining of Swan Lake -- a lush romance packed with betrayal, intrigue, magic, and adventure.

A lustful young alpha meets his match in an older omega with a past. Professor Vale Aman has crafted a good life for himself. An unbonded omega in his mid-thirties, he's long since given up hope that he'll meet a compatible alpha, let alone his destined mate. He's fulfilled by his career, his poetry, his cat, and his friends. When Jason Sabel, a much younger alpha, imprints on Vale in a shocking and public way, longings are ignited that can't be ignored. Fighting their strong sexual urges, Jason and Vale must agree to contract with each other before they can consummate their passion. But for Vale, being with Jason means giving up his independence and placing his future in the hands of an untested alpha--as well as facing the scars of his own tumultuous past. He isn't sure it's worth it. But Jason isn't giving up his destined mate without a fight. This is a stand alone gay romance novel, 118,000 words, with a strong HFN ending, as well as a well-crafted, non-shifter omegaverse, with alphas, betas, omegas, male pregnancy, heat, and knotting. Content warning for pregnancy loss and aftermath.

TransAntiquity explores transgender practices, in particular cross-dressing, and their literary and figurative representations in antiquity. It offers a ground-breaking study of cross-dressing, both the social practice and its conceptualization, and its interaction with normative prescriptions on gender and sexuality in the ancient Mediterranean world. Special attention is paid to the reactions of the societies of the time, the impact transgender practices had on individuals' symbolic and social capital, as well as the reactions of institutionalized power and the juridical systems. The variety of subjects and approaches demonstrates just how complex and widespread "transgender dynamics" were in antiquity.

composition and a treatise on the *raison d'être* of “concrete music”—is available for the first time in English translation. Schaeffer’s theories have had a profound influence on composers working with technology. However, they extend beyond the confines of the studio and are applicable to many areas of contemporary musical thought, such as defining an ‘instrument’ and classifying sounds. Schaeffer has also become increasingly relevant to DJs and hip-hop producers as well as sound-based media artists. This unique book is essential for anyone interested in contemporary musicology or media history.

### **Malachi**

*Invasion of the Body Snatchers* (1956) is a low-budget science fiction film that has become a classic. The suspense of the film lies in discovering, along with Miles, the central character (played by Kevin McCarthy), who is “real” and who is not, and whether Miles and Becky (played by Dana Wynter) will escape the pod takeover. As the center of the film moves outward from a small-town group of neighbors to the larger political scene and institutional network (of police, the FBI, hospital workers), the ultimate question is whether “they” have taken over altogether. Although *Invasion* can be interpreted in interesting ways along psychological and feminist lines, its importance as a text has centered primarily on political and sociological readings. In his introduction to this volume, Al LaValley explores the politics of the original author of the magazine serial

## Access Free Hunted A M M Shifter Romance River Den Omegas Book 3

story on which the film is based, Don Siegel; and of its screenwriter, Daniel Mainwaring. And he looks at the ways the studio (Allied Artists) tried to neutralize certain readings by tacking on an explanatory frame story. The commentary section includes readings by Stephen King, Peter Biskind, Nora Sayre, and Peter Bogdanovich. A section of postproduction documents reproduced here (many for the first time) includes many written by Wanger and Siegel. The volume also contains two previously unpublished framing scripts written for Orson Welles. For students and individual enthusiasts, the contextual materials are particularly interesting in showing how crucial the postproduction history of a film can be. A filmography and bibliography are also included in the volume. Al LaValley is the director of film studies at Dartmouth. He is the author of many articles on film and editor of *Mildred Pierce* in the Wisconsin screenplay series.
