State Capitalism and Working-class Radicalism in the French Aircraft Industry

The History of the Standard Oil Company

"Using the example of the aircraft industry, which takes him like an arrow to the heart of many of the key conflicts in French life between 1936 and 1948, Herrick Chapman has written a penetrating and exceptionally well documented account of the way that France developed her present style of industrial relations, in which the state plays such a central role. No book I know so successfully integrates the history of aviation . . . with the political and social history of France. Both thorough and thoughtful, it is an impressive achievement."--Robert Wohl, University of California, Los Angeles "An unusual, innovative book based on impressive research that throws new light in a major way on twentieth-century French politics and society . . . one of the most interesting and original monographs in modern French history in a long time."--Robert O. Paxton, Columbia University "This is a breakthrough of considerable importance. [Chapman] will become the leading North American, perhaps even English-speaking, historian of contemporary France."--George Ross, Brandeis University

Prepping For Success

The Boy Who Made the World Disappear

Are you the occasional spotter who goes out every once in a while for some fresh air and a quick spot? Or are you the hardened enthusiast, who thinks nothing of getting up early at the weekend and heading off to the far flung corners of the country to visit a specific airport or airfield to get some aviation action? Whichever you may be, this is a really useful little book to jot down truck details when you are out and about. Contains 28 pages allowing the recording of up to 528 aircraft numbers (plus name/details and operator/details), as well as some useful tips to enjoy your hobby safely. Keep the book handy in your coat pocket or camera bag, ready for that next trip to the airport! This book is part of the Really Useful

Publishing Company's Spotter Jotter Series. The I-spy Guide to Aircraft

I-SPY Nature

i-SPY Castles and Battles will tell you all about the exciting and fascinating stories of castles and battles that are all around the British Isles. You need 1000 points to send off for your i-SPY certificate but that is not too difficult because there are masses of points. Keep your eyes open for castles and battles! Designed to stimulate children's observational skills, these activity and educational guides make learning fun and more enjoyable. Each i-SPY Guide is arranged in thematic colour-coded sections, to help your i-SPYing activity featuring:- Many colour photos and illustration- A short and lively factual description about each entry, with tips on where best to i-SPY.- Points to score Every time you score 1000 points in an i-SPY book, you can apply for a certificate to celebrate your achievement!

Commercial Aviation in the Jet Era and the Systems that Make it Possible

A down-to-earth guide for anyone traveling overseas with children, whether on a two-week family vacation or a long-stay posting in the developing world.

The I-Spy Guide to Aircraft

“The undisputed king of the comic crime novel.” —Providence Journal “I guarantee Dorsey will never win the Nobel Prize for Literature—he’s far too funny.” —Richmond Times-Dispatch “If you’ve never read Dorsey, you need to start...You won’t be disappointed.” —Miami Herald Gloriously unrepentant Florida serial killer Serge Storms is back—and he’s finagled his way into becoming a secret agent in Miami—in another outrageous crime comedy from New York Times bestselling author, Tim Dorsey. In Pineapple Grenade, the incomparable Serge takes up spying for the president of a banana republic, and now Homeland Security wants to bring him down. It’s always a wild ride when Dorsey’s at the wheel, and with Pineapple Grenade he delivers his most explosively hilarious road trip to date.

Secret Science: The Amazing World Beyond Your Eyes

NATIONAL BESTSELLER • The dramatic, untold history of the heroic women recruited by Britain’s elite spy agency to help pave the way for Allied victory in World War II “Gripping. Spies, romance, Gestapo thugs, blown-up trains, courage, and treachery (lots of treachery)—and all of it true.”—Erik Larson, author of *The Devil in the White City* and *Dead Wake* In 1942, the Allies were losing, Germany

seemed unstoppable, and every able man in England was on the front lines. To “set Europe ablaze,” in the words of Winston Churchill, the Special Operations Executive (SOE), whose spies were trained in everything from demolition to sharpshooting, was forced to do something unprecedented: recruit women. Thirty-nine answered the call, leaving their lives and families to become saboteurs in France. In *D-Day Girls*, Sarah Rose draws on recently declassified files, diaries, and oral histories to tell the thrilling story of three of these remarkable women. There’s Andrée Borrel, a scrappy and streetwise Parisian who blew up power lines with the Gestapo hot on her heels; Odette Sansom, an unhappily married suburban mother who saw the SOE as her ticket out of domestic life and into a meaningful adventure; and Lise de Baissac, a fiercely independent member of French colonial high society and the SOE’s unflappable “queen.” Together, they destroyed train lines, ambushed Nazis, plotted prison breaks, and gathered crucial intelligence—laying the groundwork for the D-Day invasion that proved to be the turning point in the war. Rigorously researched and written with razor-sharp wit, *D-Day Girls* is an inspiring story for our own moment of resistance: a reminder of what courage—and the energy of politically animated women—can accomplish when the stakes seem incalculably high. Praise for *D-Day Girls* “Rigorously researched . . . [a] thriller in the form of a non-fiction book.”—Refinery29 “Equal parts espionage-romance thriller and historical narrative, *D-Day Girls* traces the lives and secret activities of the 39 women who answered the call to infiltrate France. . . . While chronicling the James Bond-worthy missions and love affairs of these women, Rose vividly captures the broken landscape of war.”—The Washington Post “Gripping history . . . thoroughly researched and written as smoothly as a good thriller, this is a mesmerizing story of creativity, perseverance, and astonishing heroism.”—Publishers Weekly (starred review)

Operation Crossbow

I-SPY Cars

This is the inspiring story of an ordinary guy who achieved two great goals that others had told him were impossible. First, he set a record for the longest automobile journey ever made around the world, during the course of which he blasted his way out of minefields, survived a breakdown atop the Peak of Death, came within seconds of being lynched in Pakistan, and lost three of the five men who started with him, two to disease, one to the Vietcong. After that—although it took him forty-seven more years—Albert Podell set another record by going to every country on Earth. He achieved this by surviving riots, revolutions, civil wars, trigger-happy child soldiers, voodoo priests, robbers, pickpockets, corrupt cops, and Cape buffalo. He went around, under, or through every kind of earthquake, cyclone, tsunami, volcanic eruption, snowstorm, and sandstorm that nature threw at him. He ate everything from old camel meat and rats to dung beetles and the brain of a live monkey. And he overcame attacks by crocodiles, hippos, anacondas, giant leeches, flying crabs—and several beautiful girlfriends who insisted that he stop this nonsense and marry them. Albert Podell's *Around the World in 50 Years* is a remarkable and meaningful tale of quiet courage, dogged persistence, undying determination, and an uncanny ability to extricate himself from one perilous situation after another—and return with some of the most memorable, frightening,

and hilarious adventure stories you have ever read.

I-SPY Cool Cars

Your Child Abroad

When he is wrongfully implicated in a terrorist attack that interrupted his rendezvous with his dishonored spy wife, physician Jonathan Ransom tries to clear his name, but discovers that he may be a pawn in an international plot.

The Geneva Trap

Beat the boredom and take time out from screens with this pocket-sized book packed with facts, photos and fantastic spots for hours of fun! Kids will have fun collecting points with more than 140 car models to find. From Minis and Fiats to Maseratis and Ferraris, they'll learn about all types of automobiles. And once they've scored 1000 points, super-spotters can claim their official i-SPY certificate and badge. With more than 30 i-SPY books to collect, there's something for everyone! For even more fun on the go check out i-SPY On a Car Journey (ISBN 9780008386443).

At the Airport

A brand-new book from the UK and Ireland's best-loved comedian, Dara O Briain! So you think everyday life is boring?! WHAT?! Hoo-ee, are you wrong! No, seriously. There's so much EXTRAORDINARY science going on right from the minute you wake up to when you go to sleep. Actually, while you're asleep, too. Science is a non-stop EVERYWHERE, everything adventure with some incredibly cool stuff going on, too. You've got your incredible brain, which has worked out how to read these words and make playing a video game feel as EXCITING as real life; you've got aeroplanes that can somehow get from the ground into the sky with all those people AND their luggage on board; you've got electricity and artificial intelligence and GPS and buses coming in threes (that's science too) and LOADS more. In Secret Science, Dara O Briain takes you on a journey from the comfort of your favourite chair to the incredible science behind your everyday life and on into the future!

Planet Funny

The War in South Vietnam

Toot, toot! Get onboard the Thomas & Friends Annual 2021! The Thomas & Friends Annual 2021 is packed full with all your favourite engines plus plenty of stories, activities, puzzles, colouring and games to keep young fans entertained. See the engines work hard in Sodor and travel around the world, meeting all sorts of animals along the way. It's the perfect present for young Thomas fans aged 3 years and over. Thomas has been teaching children lessons about life and

friendship for 75 years. He ranks alongside other beloved characters such as Paddington Bear, Winnie-the-Pooh and Peter Rabbit as an essential part of our literary heritage.

Aircraft Enthusiasts Spotter Jotter

Packed with interesting information about all kinds of aircraft, airlines, and travel, this book is sure to keep them occupied from the moment they check in. The vibrant photographs of tail fins and vehicles, and tips on where to spot them, ensure that it won't be long before they have enough points to claim an i-SPY At the Airport certificate. From control towers and aircraft to airline logos and buses, there are lots of exciting features to spot at airports, wherever you're flying to! i-SPY At the Airport includes hundreds of signs and vehicles, so keep an i-SPY out wherever your travels may take you! "up to 200 fun things to spot around you" "tick it off when you see it" "score it" score points for each spot and send off for your official i-SPY certificate Children will love using this fun and fascinating i-SPY book!

I-SPY Birds

Search for over 100 types of cool cars with this i-SPY guide. This fun activity book will get kids looking out for vehicles on long car journeys and in and around towns search of i-SPY points. 120 models to spot of the coolest cars you can spot on Britains road, from the supercar Ferrari 458 Italia and Lotus Evora to the quirky Mini Classic and Citroen 2CV. Cars in this book have been selected for their distinctive features, design and performance. Designed to stimulate children's observational skills, these activity and educational guides make learning fun and more enjoyable. Each i-SPY Guide is arranged in thematic colour-coded sections, to help your i-SPYing activity featuring: * Many colour photos and illustration * A short and lively factual description about each entry, with tips on where best to i-SPY. * Points to score Every time you score 1000 points in an i-SPY book, you can apply for a certificate to celebrate your achievement!

I-Spy Aircraft

The U. S. Air Service in World War I

A Kirkus Reviews Best Book of the Year The witty and exuberant New York Times bestselling author Ken Jennings relays the history of humor in "lively, insightful, and crawling with goofy factlings," (Maria Semple, author of Where'd You Go Bernadette)—from fart jokes on clay Sumerian tablets to the latest Twitter gags and Facebook memes. Where once society's most coveted trait might have been strength or intelligence or honor, today, in a clear sign of evolution sliding off the trails, it is being funny. Yes, funniness. Consider: Super Bowl commercials don't try to sell you anymore; they try to make you laugh. Airline safety tutorials—those terrifying laminated cards about the possibilities of fire, explosion, depressurization, and drowning—have been replaced by joke-filled videos with multimillion-dollar budgets and dance routines. Thanks to social media, we now

have a whole Twitterverse of amateur comedians riffing around the world at all hours of the day—and many of them even get popular enough online to go pro and take over TV. In his “smartly structured, soundly argued, and yes—pretty darn funny” (Booklist, starred review) Planet Funny, Ken Jennings explores this brave new comedic world and what it means—or doesn’t—to be funny in it now. Tracing the evolution of humor from the caveman days to the bawdy middle-class antics of Chaucer to Monty Python’s game-changing silliness to the fast-paced meta-humor of The Simpsons, Jennings explains how we built our humor-saturated modern age, where lots of us get our news from comedy shows and a comic figure can even be elected President of the United States purely on showmanship. “Fascinating, entertaining and—I’m being dead serious here—important” (A.J. Jacobs, author of The Year of Living Biblically), Planet Funny is a full taxonomy of what spawned and defines the modern sense of humor.

Is There Anybody Out There?

Packed with interesting information about over 100 car logos, with a close-up photograph of each, it won’t be long before they have enough points to claim an i-SPY Car Badges certificate. From Renaults and Fiats to Aston Martins and Ferraris, there are all sorts of car logos to look out for. i-SPY Car Badges includes hundreds of car badges for you to spot, so keep an i-SPY out wherever you go! “spy it” up to 200 fun things to spot around you “spot it” tick it off when you see it “score it” score points for each spot and send off for your official i-SPY certificate Children will love using this fun and fascinating i-SPY book!

Fast Food Nation

This volume gathers 19 papers first presented at the 5th International Symposium of the ICA Commission on the History of Cartography, which took place at the University of Ghent, Belgium on 2-5 December 2014. The overall conference theme was 'Cartography in Times of War and Peace', but preference was given to papers dealing with the military cartography of the First World War (1914-1918). The papers are classified by period and regional sub-theme, i.e. Military Cartography from the 18th to the 20th century; WW I Cartography in Belgium, Central Europe, etc.

Pineapple Grenade

Aviation has revolutionised warfare over the last 100 years, and this new pocket guide gives the reader the essential details of 70 iconic aircraft, including the Sopwith Camel, the Spitfire, the Messerschmitt Bf 109, the P-51 Mustang and the F-4 Phantom. Drawing on Osprey's comprehensive aviation archive, the Plane Spotter's Guide uses detailed profile artwork to illustrate and aid recognition, as well as specification boxes to provide all the technical details.

D-Day Girls

United States Air Force in Southeast Asia. Documents the Air Force's support of the ground war in South Vietnam from 1965 to early 1968. Includes sections on the air

campaign conducted during the Communists' siege of the Marine camp of Khe Sanh. Also contains several appendices, a glossary, and bibliographical notes.

Car Badges

Aircraft and Submarines: The Story of the Invention, Development, and Present-Day Uses of War's Newest Weapons

Describes the things seen at an airport and explains the activities of people who work there.

The Romance of Aircraft

A SIMPLE GUIDE TO A BETTER YOU! Prepping for success is a guided journey that equips you with the principles you need in order to take advantage of your innate inner talents to achieve true success. The 10 keys allow you to not just understand yourself, but they also teach you how to express your best self to others. This enables you to be the best version of yourself. This book is an inspirational, light-hearted guide to help you put your plans into action. It offers an understandable and relatable step by step approach to discovering yourself and achieving your own personal true success. In a world where there are so many choices and distractions, this book is dedicated to helping you find a balance through it all. Are you ready to begin your Journey towards true success? "With this book, I hope to bring to the readers the main key concept that's have helped me in my life and have made me a better and a more productive person; as I too Prep for Success. I am writing a book that I wish someone gave me 10 years ago, Would have made life so much easier" - Anmol Singh This is not a business book and this sure isn't a trading book. This book is about achieving Success in Each and EVERY area of your Life.

Training to Fly - Military Flight Training 1907-1945

This I-Spy book is based on what you will see around the skies of the United Kingdom.

I-SPY on a Road Trip

When the Great War began in Europe in August 1914, aviation in the U.S. Army was a function of the Signal Corps. Its mission was to support infantry and artillery by providing observation services. There were people in the Army and outside who could foresee no other military use for aircraft. Others believed that the airplane should be given a combat role. Some thought that aviation should be a separate combat arm. As news of aerial operations in the European war drifted across the Atlantic, there was more and more talk of buying fighting planes, battle planes, and bomb-dropping planes for the U.S. Army. Although some faltering steps were taken, little progress was made toward building a fighting air force-or even toward developing observation services for the ground forces-before the United States entered the war in April 1917. Having joined Great Britain, France, and Italy in war

against Germany and Austria, the United States quickly drew plans for an air service to include fighting and bombing airplanes as well as observation planes and balloons. The allies, who had been fighting for two years or more and were much farther advanced in military aviation, provided valuable information to help the United States build up its air service. Allied contributions included not only technical data on new developments in aircraft and other aeronautical equipment but also information on how to use aviation in battle. One thing borrowed from the allies was the classification of military aviation into three, broad, functional areas labeled "observation," "pursuit," and "bombardment." Another was the concept that aviation had two separate roles, one "tactical," the other "strategical." In addition, the Allies provided ideas, along with detailed information about tactics, techniques, and procedures, that formed the foundation for the employment of the Air Service, American Expeditionary Forces (AEF), in World War I. The wartime operations of the Air Service, AEF, included visual and photographic reconnaissance, artillery adjustment, infantry liaison, counterair operations, bombing and strafing in close support of ground forces, and interdiction of the enemy's lines of communications. The war ended before US. units were ready for strategic air operations, but thinking on strategic air warfare had advanced far enough to raise, and tentatively answer, questions concerning area versus precision bombing and day versus night operations. Thus, US. military aviation in November 1918 was far different from what it had been when the war began four years earlier.

Aircraft and Submarines

At a tracking station in Virginia, U.S. Navy officers watch in horror as one of their communications satellites plummets into the Indian Ocean and panic spreads through the British and American intelligence services. When a Russian intelligence officer approaches MI5 with vital information about the cyber sabotage, he refuses to talk to anyone but Liz Carlyle. But who is he, and how is he connected to Liz? Is this a Russian plot to disable the West's defenses? Or is the threat coming from elsewhere? As Liz and her team search for a mole inside the Ministry of Defense, the trail takes them from Geneva, to Marseilles, and to Korea in a race against time to stop the Cold War from heating up.

Civil Aircraft Recognition

"Aircraft and Submarines" by Willis J. Abbot. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Around the World in 50 Years

Castles and Battles

Explores the homogenization of American culture and the impact of the fast food industry on modern-day health, economy, politics, popular culture, entertainment, and food production.

Thomas and Friends Annual 2021

The story of the photographic intelligence work undertaken from a country house at Medmenham, Buckinghamshire, is one of the great lost stories of the Second World War . At its peak in 1944, almost 2,000 British and American men and women worked at the top-secret Danesfield House, interpreting photographs - the majority stereoscopic so they could be viewed in 3D - to unlock secrets of German military activity and weapons development. Millions of aerial photographs were taken by Allied pilots, flying unarmed modified Spitfires and Mosquitos on missions over Nazi Europe. It was said that an aircraft could land, the photographs be developed and initial interpretation completed within two hours - marking the culmination of years of experiments in aerial intelligence techniques. Their finest hour began in 1943, during the planning stages of the Allied invasion of Europe, when Douglas Kendall, who masterminded the interpretation work at Medmenham, led the hunt for Hitler's secret weapons. Operation Crossbow would grow from a handful of photographic interpreters to the creation of a hand-picked team, and came to involve interpreters from across the Medmenham spectrum, including the team of aircraft specialists led by the redoubtable Constance Babington Smith. In November that year, whilst analysing photographs of Peenemunde in northern Germany, they spotted a small stunted aircraft on a ramp. This intelligence breakthrough linked the Nazi research station with a growing network of sites in northern France, where ramps were being constructed aligned not only with London, but targets throughout southern Britain. Through the combined skill and dedication of the Crossbow team and the heroism of the Allied pilots, throughout late 1943 and 1944 V-weapon launch sites were located and through countermeasures destroyed, saving hundreds of thousands of lives, and changing the course of the war. Operation Crossbow is a wonderful story of human endeavour and derring-do, told for the first time.

Rules of Vengeance

I-Spy at the Airport

This book discusses the multiple systems that make commercial jet travel safe and convenient. The author starts by tracing the evolution of commercial jets from the Boeing 707 to the double decker Airbus A380. The next 7 chapters discuss flight controls, along with the high lift surfaces (flaps and slats) that are essential to allow high speed, low drag aircraft to take-off and land. The other systems include Engines/Nacelles, Cabin Pressurization and Air Conditioning systems, Landing Gear and brakes, Fuel Systems, Instruments/Sensors, and finally Deicing systems for the wings, nacelles and external air speed sensors. Case studies describe a significant accident that arose from a failure in the various systems described. The final chapter summarizes the past 60 years of jet travel and describe how these systems have created a cheaper, safer mode of travel than any other.

At the Airport

Packed with interesting information about all the things you might see on a road trip, this book is sure to make even the longest of drives more fun! Close-up photographs and handy tips on where to spot each item ensure that it won't be long before they have enough points to claim an i-SPY On a Road Trip certificate. From road signs and car badges to pheasants and foxes, you're sure to spot all sorts of things you might not expect to see on a road trip! i-SPY On a Road Trip includes hundreds of animals and road features to look out for, so keep an i-SPY out wherever you go! "Up to 200 fun things to spot around you" "spot it" "tick it off when you see it" "score it" score points for each spot and send off for your official i-SPY certificate Children will love this fun and fascinating i-SPY book!

Plane Spotter's Guide

The perfect guide for spotters and enthusiasts interested in airliners, feederliners, executive jets, light aircraft and other commercial aeroplanes. Contains 3-view silhouettes, colour photographs, dimensions, technical specifications and a potted history of those aircraft most likely to be seen in the skies and at airports. Other helpful details are included to make aircraft identification more certain.

History of Military Cartography

Science fiction meets science fact in this brand new hilarious book from one of the UK and Ireland's best-loved comedians. Genuinely qualified space expert, Dara O Briain, is here with all the answers to help you sort your Area 51s from your messages from Mars. Includes: • how life begins in the first place • how Earth was created • whether aliens might exist elsewhere in the Solar System • the search for other planets like our own • how we could possibly ever get there and . . . • would we really meet aliens? Alongside this runs the hilarious, but not very true story of Carl and his cat, Clive, who will join you on the journey of the book to help take you from novice alien-hunter to bona-fide space expert, with a brilliant final twist! So, is there anybody out there? NO. (Well, maybe.) And do aliens really exist? Probably. (Possibly.)

State Capitalism and Working-class Radicalism in the French Aircraft Industry

Following the breakout success of his instant festive classic, *The Night I Met Father Christmas*, get ready for the brilliant new novel from comedian, actor and bestselling author, Ben Miller! 'Stories are often about a good person who does a Bad Thing, and this is no exception...' Harrison tries his best to be good. He doesn't steal, he always shares with his sister and he never cheats at board games, but Harrison also has a BIG flaw ... He can't control his temper! So when he's given a black hole instead of a balloon at a party, Harrison jumps at the chance to get rid of everything that makes him cross. But when it's not just things he hates that are disappearing into the black hole but things he loves, too, Harrison starts to realise that sometimes you should be careful what you wish for An out-of-this-world

adventure about twists of fate, time travel and troublesome black holes, Ben Miller's stunning storytelling is brought to life with beautiful illustrations from emerging talent Daniela Jaglenka Terrazzini. Praise for *The Night I Met Father Christmas*: 'A gorgeous tale brimming with the magic of Christmas. A sheer delight for all kids both big AND small.' Ruth Jones, award-winning writer and comedian 'Enchanting, funny and intriguing in equal measure' Philip Ardagh, bestselling author 'Bubbles with warmth and mischievous humour irresistible' Alexander Armstrong, presenter, comedian and writer 'A fire-side gem of a story' Abi Elphinstone, bestselling author
