The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. The series IFLA Publications deals with many of the means through which libraries, information centres, and information professionals worldwide can formulate their goals, exert their influence as a group, protect their interests, and find solutions to global problems.

Domus

A group of escapees from plague-ridden Florence pass the time by telling tales of romance in this landmark of medieval literature. Features 25 of the original 100 stories. J. M. Rigg translation.

European Union Politics

This second edition of European Union Politics provides an authoritative introduction to all aspects of politics and policy in the EU. It gives readers a sense of the colour and flavour of EU politics, while systematic coverage of different theoretical perspectives encourages a more sophisticated understanding of the EU's development and function.

The Barber of Seville

The Overachievers

This book covers the essential exploratory techniques for summarizing data with R. These techniques are typically applied before formal modeling commences and can help inform the development of more complex statistical models. Exploratory techniques are also important for eliminating or sharpening potential hypotheses about the world that can be addressed by the data you have. We will cover in detail the plotting systems in R as well as some of the basic principles of constructing informative data graphics. We will also cover some of the common multivariate statistical techniques used to visualize high-dimensional data. Some of the topics we cover are making exploratory graphs, principles of analytic graphics, plotting systems and graphics devices in R, the base and ggplot2 plotting systems in R, clustering methods, and dimension reduction techniques. language. Written for people with no programming experience, this book starts with the most basic concepts and gradually adds new material. Some of the ideas students find most challenging, like recursion and object-oriented programming, are divided into a sequence of smaller steps and introduced over the course of several chapters. The focus is on the programming process, with special emphasis on debugging. The book includes a wide range of exercises, from short examples to substantial projects, so that students have ample opportunity to practise each new concept. Exercise solutions and code examples are available from thinkpython.com, along with Swampy, a suite of Python programs that is used in some of the exercises.

Parlare di Cultura dell'acqua e progettazione paesistica significa, anzitutto, confrontarsi con la complessità dell'elemento "acqua". Liquido incolore e insapore, origine dell'umanità, "oro blu" del pianeta, protagonista dinamico, camaleontico ed imprevedibile del territorio, componente del paesaggio in perenne trasformazione nei confini, nelle forme, mai eguale a se stesso, con valenze simboliche, rituali e metafisiche difficilmente eguagliabili. Parlare di Cultura dell'acqua e progettazione paesistica significa affrontare la questione della sostenibilità in termini ecologico-ambientali, economici, etici. Parlare di Cultura dell'acqua e progettazione paesistica significa porre l'accento sulle criticità e sull'emergenze. Emergenza a scala "globale", vera e propria crisi planetaria che vede l'acqua tra due estremi: da una parte, l'acqua che fa paura perché manca, non c'è (siccità e desertificazione) e, all'opposto, l'acqua che fa paura in quanto calamità che distrugge, devasta,

inonda (alluvioni). Emergenza alla scala del "quotidiano" da ricercarsi nella persistente offesa ai paesaggi d'acqua (dai fiumi, ai laghi, alle zone umide), al sempre più colorito e poco rispettoso lessico fatto di "indifferenza", "emarginazione" e degrado. Parlare di Cultura dell'acqua e progettazione paesistica significa mettere in primo piano il patrimonio di memorie, valori, saperi ed identità, oggi sempre più a rischio estinzione e per questo da recuperare e salvaguardare. Parlare di Cultura dell'acqua e progettazione paesistica significa, infine, impegnarsi nella costruzione di una piattaforma comune di riferimenti conoscitivi e di opzioni strategiche, da cui far discendere indicazioni per la definizione di regole e di indirizzi ("sistema delle scelte") in grado di soddisfare le diverse esigenze e le aspettative delle comunità locali, in accordo con i principi della sostenibilità, dello sviluppo e della qualità paesistica dei luoghi d'acqua. Michele Ercolini (La Spezia, 1974), Architetto, Dottore di Ricerca in Progettazione paesistica, attualmente è Assegnista di ricerca (ICAR/15) presso il Dipartimento di Urbanistica e Pianificazione del Territorio dell'Università degli Studi di Firenze. Dal 2006 svolge attività didattica come Docente a contratto presso le Università degli Studi di Firenze, Perugia e Bologna. Ha promosso, organizzato e coordinato Seminari di studio e Convegni nazionali ed internazionali. Oltre all'attività didattica e di ricerca, dal 2001 ha intrapreso collaborazioni professionali con particolare riguardo agli interventi su aree sensibili, pianificazione paesistica, pianificazione delle aree protette, riqualificazione ambientale, pianificazione urbanistica, eccetera. Ha pubblicato libri, saggi e articoli su riviste specializzate.

how our high-stakes educational culture has spiraled out of control. During the year of her ten-year reunion, Robbins goes back to her high school, where she follows heart-tuggingly likeable students including "AP" Frank, who grapples with horrifying parental pressure to succeed; Audrey, whose panicked perfectionism overshadows her life; Sam, who worries his years of overachieving will be wasted if he doesn't attend a name-brand college; Taylor, whose ambition threatens her popular girl status; and The Stealth Overachiever, a mystery junior who flies under the radar. Robbins tackles teen issues such as intense stress, the student and teacher cheating epidemic, sports rage, parental guilt, the black market for study drugs, and a college admissions process so cutthroat that students are driven to suicide and depression because of a B. With a compelling mix of fast-paced narrative and fascinating investigative journalism, *The Overachievers* aims both to calm the admissions frenzy and to expose its escalating dangers.

the demands on today's student and today's classroom. A broad and thorough introduction to physics, this new edition maintains its highly respected, traditional approach while implementing some new solutions to student difficulties. Many ideas stemming from educational research help students develop greater confidence in solving problems, deepen conceptual understanding, and strengthen quantitative-reasoning skills, while helping them connect what they learn with their other courses and the changing world around them. Math review has been expanded to encompass a full chapter, complete with end-of-chapter questions, and in each chapter biomedical applications and problems have been added along with a set of MCAT-style passage problems. Media resources have been strengthened and linked to the Pearson eText, MasteringPhysics®, and much more. This package contains: College Physics, Ninth Edition

Gnuplot is a portable command-line driven graphing utility for Linux, OS/2, MS Windows, OSX, VMS, and many other platforms. The source code is copyrighted but freely distributed (i.e., you don't have to pay for it). It was originally created to allow scientists and students to visualize mathematical functions and data interactively, but has grown to support many non-interactive uses such as web scripting. It is also used as a plotting engine by third-party applications like Octave. Gnuplot has been supported and under active development since 1986. Gnuplot supports many types of plots in either 2D and 3D. It can draw using lines, points, boxes, contours, vector fields, surfaces, and various associated text. It also supports various specialized plot types. This manual is available online for free at gnuplot.info. This manual is printed in grayscale.

The volume collects papers presented at the International Conference "Greek Medical Papyri - Text, Context, Hypertext" held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to "medical texts", contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the

pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the "doctors' context", providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.
