Los estudios presentados sobre la interaccion verbal terapeuta-cliente permiten concluir que el primero responde diferencialmente a las verbalizaciones del cliente, modificando las contingencias verbales segun el contenido de aquellas se acerque o aleje de los objetivos terapeuticos. Estos resultados muestran la posible existencia de procesos de "moldeamiento" verbal, a traves de los cuales el terapeuta modificaria la conducta verbal del cliente hacia formas mas adaptativas. Al mismo tiempo, este estudio supone una alternativa a la tradicional controversia

Why would the work of the 17th century philosopher Benedict de Spinoza concern us today? How can Spinoza shed any light on contemporary thought? In this intriguing book, Moira Gatens and Genevieve Lloyd show us that in spite of or rather because of Spinoza's apparent strangeness, his philosophy can be a rich resource for cultural self-understanding in the present. *Collective Imaginings* draws on recent re-assessments of the philosophy of Spinoza to develop new ways of conceptualising issues of freedom and difference. This ground-breaking study will be invaluable reading to anyone wishing to gain a fresh perspective on Spinoza's thought.

US-Mexico border region area has unique social, demographic and policy forces at work that shape the health of its residents as well as serves as a microcosm of migration health challenges facing an increasingly mobile and globalized world. This region reflects the largest migratory flow between any two nations in the world. Data from the Pew Research Center shows over the last 25 years there has never been lower than 140,000 annual immigrants from Mexico to the United States (with peaks over 700,000). This migratory route is extremely hazardous due to natural (e.g., arid and hot desert regions) and human made barriers as well as border enforcement practices tied to socio-political and geopolitical pressures. Also, reflecting the national interdependency of public health and human services needs, during the most recent five year period surveyed the migratory flow between the US and Mexico has equaled that of the flow of Mexico to the US--both around 1.4 million persons. Of particular public health concern, within the US-Mexico region of both nations there is among the highest disparities in income, education, infrastructure and access to health care--factors within the World Health Organization's conceptualization of the Social Determinants of Health, and among the highest rates of chronic disease. For instance obesity and diabetes rates in this region are among the highest of those monitored in the world, with adult population estimates of the former over 40% and estimates in some population sub-groups for the latter over 20%. The publications reflected in this Research Topic, all

reviewed from experts in the field, addressed many of the public health issues in the US Mexico Border Health Commission's Healthy Border 2020 objectives. Those objectives-- broad public health goals used to guide a diverse range of government, research and community-based stakeholders--include Non Communicable Diseases (including adult and childhood obesity-related ones; cancer), Infectious Diseases (e.g., tuberculosis; HIV; emerging diseases--particularly mosquito borne illnesses), Maternal and Child Health, Mental Health Disorders, and Motor Vehicle Accidents. Other relevant public health issues affecting this region, for example environmental health, binational health services coordination (e.g., immunization), the impact of migration throughout the Americas and globally in this region, health issues related to the physical climate, access to quality health care, discrimination/mistreatment and well-being, acculturative/immigration stress, violence, substance use/abuse, oral health, respiratory disease, and well-being from a social determinants of health framework, are critical areas addressed in these publications or for future research. Each of these Research Topic publications presented applied solutions (e.g., new programs, technology or infrastructure) and/or public health policy recommendations relevant to each public health challenge addressed.

The more modern culture shines its light on sex, the longer the shadow it casts. This shadow is commercialism, pornography and shame. This approach to sexuality distorts it to create performance pressure, increasing numbers of sexual 'dysfunctions' and a fundamental disconnect from ourselves and others. Yet sexuality is one of the most important paths to happiness, simply because it requires us to engage all the other aspects of ourselves. To have deeply satisfying sex we must engage the mind, the body and our feelings. *Real Sex* will show you how almost everything that our society has tried to teach you about your sexuality is misleading or simply wrong. *Real Sex* is a journey into the heart of your sexual self; a way of creating meaningful and fulfilling intimacy. It sets out seven keys that will teach you how to love and accept your mind, body, feelings, desires and sexuality at a deeper level, leaving behind feelings of guilt, insecurity and shame. *Real Sex* offers a new, integrated idea of sexuality that holds a positive perspective of the sexual beings that we are; longing for intimacy and aliveness that we know deep down makes our lives meaningful.

years. From their founding, both nations and their people, for untold generations, were consecrated and dedicated to God. Who are these nations? They are ancient Israel and America. Both nations were plagued with historical amnesia—the failure to pass on to future generations the story about the protection, blessings, and prosperity they had received at the hand of a loving and compassionate God. As a result, apostasy began to gain traction so that the people of each nation began replacing the worship of God with flourishing idolatry. What happened to ancient Israel is history. God waited patiently for the nation to return to him so that he could destroy its enemies and heal the nation. He patiently tolerated its defiance but finally declared his righteous judgment, allowing the evil Assyrians to destroy that nation, and ancient Israel disappeared from biblical history. The status of America remains in limbo as God waits patiently for America to respond positively to his plea to return to him while it defiantly marches to its impending doom. Time is running out! A chapter is included that is directed to the reader who is doubtful that America will return to God but is also concerned about the eternal destination of his soul should America be destroyed by a cataclysmic event.

Humanity is aging. In the last century, life expectancy has increased by as much as 25 years, the greatest increase in 5'000 years of history. As a consequence the elderly constitute today the fastest growing segment of the world's population. This new situation creates many social problems and challenges to health care which both the developed as well as the developing countries will have to cope with. The present publication shows that scientific progress has reached a level where nutritional interventions may play a decisive part in the prevention of degenerative conditions of age, improvement of quality of life and impact on health care burden and resources. Topics deal with such different aspects as the influence of prenatal and early infant nutrition on the future aged individual and effects of energetic restriction on longevity. Further contributions include studies on mitochondrial alterations, digestive problems, specific metabolic deviations mediated by insulin, bone degradation, structural changes, neuromuscular dysfunctions, mental state of the elderly as well as the response of the immune system to nutrient intake. Finally the book offers a review of requirements appropriate to meet the age-related public health challenges of the 21st century.

From Bradley Manning and WikiLeaks to LulzSec and Anonymous, from the Icelandic Modern Media Initiative to the revelations of Edward Snowden, a coalition is breaking through the secrecy that lies at the core of the modern state. The story gets more complex when open government is contrasted with black transparency, and when a geopolitical rift between the West and Russia becomes the dividing line for whistleblowers and transparency activists seeking refuge. What is transparency for one may be propaganda for the other.

This book analyses the aesthetic and utopian dimensions of various activist social movements in Western Europe since 1989. Through a series of case studies, it demonstrates how dreams of a better society have manifested themselves in contexts of political confrontation, and how artistic forms have provided a language to express the collective desire for social change. the 1993 occupation of Claremont Road in east London, an attempt to prevent the demolition of homes to make room for a new motorway. In a squatted row of houses, all available space was transformed and filled with elements that were both aesthetic and defensive – so when the authorities arrived to evict the protestors, sculptures were turned into barricades. At the end of the decade, this kind of performative celebration merged with the practices of the antiglobalisation movement, where activists staged spectacular parallel events alongside the global elite's international meetings. As this book shows, social movements try to erase the distance that separates reality and political desire, turning ordinary people into creators of utopias. Squatted houses, carnivalesque street parties, counter-summits, and camps in central squares, all create a physical place of these utopian visions

As author Bryna Nelson Paston says, "We have a window of opportunity as grandparents, usually five years, or maybe more if you're lucky. So you have to make your move fast and decisively. Your kids and their spouses will intrude, interrupt, and interfere. But persevere. Circumvent them, do exactly what you want, and lie— with dignity, I might add. Whatever it takes. Promise anything, but get the kid."

tasks, revolving around interaction: pair and group work to carry out the tasks and exercises to practice the points covered. These include work on declarative and operative knowledge of both translation and medical texts and favour an approach that takes into account both the process and product of translations. Starting from a broad communication framework, the book follows a top-down approach to medical translation: communication → genres → texts → terms and other units of specialized knowledge. It is positively focused in that it does not insist on error analysis, but rather on ways of writing good translations and empowering both students and teachers. The text can be used as a course book for students in face-to-face learning, but also in distance and mixed learning situations. It will also be useful for teachers as a resource book, or a core book to be complemented with other materials.

A Terrace in Rome describes the tormented life of Geoffroy Meaume, a 17th-century engraver of encrypted shadows and erotic prints. After a passionate affair in his youth concludes with his face being burned by acid thrown by his lover's jealous fiancé, Meaume undertakes a lifetime of wandering, his psyche forever engraved by the memory of the woman who spurned him. This fragmented narrative of a man attacked by images is related in 47 short chapters which themselves act as engravings; a tale told by an antiquarian, full of fragmented vision and sexual hell. First published in French in 2000, *A Terrace in Rome* received the Grand Prix du Roman de l'Académie Française that same year, and went on to be translated into 19 languages. This is its first appearance in English. Pascal Quignard (born 1948) has written over 60 books of fiction, essays, and his own particular genre of philosophical reflection that straddles the personal journal, historical narrative and poetic theory. His books in English include *Albucius*, *All the World's Mornings*, *The Sexual Night*, *Sex and Terror*, *On Wooden Tablets: Apronenia Avitia*, and *The Salon in Wurttemberg*, as well as the multiple volumes of his ongoing book project *The Last Kingdom*, which, to date, includes *The Roving Shadows*, *The Silent Crossing* and *Abysses*.
