Online student resource material can be accessed under the 'Support Materials' tab at <https://www.routledge.com/9780367207939> Doing Academic Research is a concise, accessible, and tightly organized overview of the research process in the humanities, social sciences, and business. Conducting effective scholarly research can seem like a frustrating, confusing, and unpleasant experience. Early researchers often have inconsistent knowledge and experience, and can become overwhelmed – reducing their ability to produce high quality work. Rather than a book about research, this is a practical guide to doing research. It guides budding researchers along the process of developing an effective workflow, where to go for help, and how to actually complete the project. The book addresses diversity in abilities, interest, discipline, and ways of knowing by focusing not just on the process of conducting any one method in detail, but also on the ways in which someone might choose a research method and conduct it successfully. Finally, it emphasizes accessibility and approachability through real-world examples, key insights, tips, and tricks from active researchers. This book is a highly useful addition to both content area courses and research methods courses, as well as a practical guide for graduate students and independent scholars interested in publishing their research.

about the visual arts. Using a wealth of examples, the first half of the text examines the nature, vocabulary, and elements of art, offering a foundation for students to learn to analyze art effectively. The latter half sets out a brief but comprehensive history of art, leading students to understand art within the context of its time and place of origin. High quality images from a wide range of periods and cultures bring the art to life, and topical essays throughout the text foster critical thinking skills. Taken together, all of these elements help students to better appreciate art as a reflection of the human experience and to realize that living with art is living with ourselves.

"Being Black, Living in the Red is an important book. In Conley's persuasive analysis the locus of current racial inequality resides in class and property relations, not in the labor market. This carefully written and meticulous book not only provides a compelling explanation of the black-white wealth differential, it also represents the best contribution to the race-class debate in the past two decades."—William Julius Wilson, author of *When Work Disappears: The World of the New Urban Poor*

"In *Being Black, Living in the Red*, Dalton Conley has taken the discussion of race and inequality into important new territory. Even as income inequality is shrinking, Conley shows, the wealth gap endures. That gap, he argues lucidly, explains much of the persisting 'two societies' phenomenon—it contributes significantly to inequalities in education, work, even

family structure. Those concerned about equity in America will find this book indispensable reading."—David Kirp, author of *Our Town: Race, Housing, and the Soul of America* "With methodological sophistication Dalton Conley's well written book makes a significant contribution to our understanding of the precarious social and economic predicament that African Americans continue to experience."—Martin Sanchez-Jankowski, author of *City Bound: Urban Life and Political Attitudes Among Chicano Youth* "Picking up where Oliver and Shapiro (*Black Wealth, White Wealth*) left off, Conley details how and why facets of net worth cascade into long-term inequalities. All sides will be impressed with Conley's thorough scholarship and richly detailed analysis."—Troy Duster, co-editor of *Cultural Perspectives on Biological Knowledge* "Being Black, Living in the Red is the most convincing analysis yet of the importance of wealth for the life chances of African Americans. Thanks to Conley's stunning data and adroit theoretical discussions, social scientists and policymakers can no longer ignore wealth as they attempt to deal with the thorny issue of racial inequality. A must read!"—Melvin L. Oliver, author of *Black Wealth, White Wealth: A New Perspective on Racial Inequality*

Being Black, Living in the Red

Politics is a work of political philosophy by Aristotle, a 4th-century BC Greek philosopher. The end of the Nicomachean Ethics declared that the inquiry into ethics necessarily follows into politics, and the two works are frequently considered to be parts of a larger treatise, or perhaps connected lectures, dealing with the "philosophy of human affairs." The title of the Politics literally means "the things concerning the polis." Aristotle's Politics is divided into eight books which are each further divided into chapters. Citations of this work, as with the rest of the works of Aristotle, are often made by referring to the Bekker section numbers. Politics spans the Bekker sections 1252a to 1342b. After studying a number of real and theoretical city-states' constitutions, Aristotle classified them according to various criteria. On one side stand the true (or good) constitutions, which are considered such because they aim for the common good, and on the other side the perverted (or deviant) ones, considered such because they aim for the well being of only a part of the city. The constitutions are

then sorted according to the "number" of those who participate to the magistracies: one, a few, or many. Aristotle's sixfold classification is slightly different from the one found in *The Statesman* by Plato. The diagram above illustrates Aristotle's classification. The literary character of the *Politics* is subject to some dispute, growing out of the textual difficulties that attended the loss of Aristotle's works. Book III ends with a sentence that is repeated almost verbatim at the start of Book VII, while the intervening Books IV–VI seem to have a very different flavor from the rest; Book IV seems to refer several times back to the discussion of the best regime contained in Books VII–VIII. Some editors have therefore inserted Books VII–VIII after Book III.

Mosby's Textbook for Nursing Assistants

Named a best book of the summer by Literary Hub The life and times of a militant white supremacist, written by one of his offspring, National Book Award-winner Edward Ball *Life of a Klansman* tells the story of a warrior in the Ku Klux Klan, a carpenter in Louisiana who took up the cause of fanatical racism during the years after the Civil War. Edward Ball, a descendant of the Klansman, paints a portrait of his family's anti-black militant that is part history, part memoir rich in personal detail. Sifting through family lore about "our Klansman" as well as public and private records, Ball reconstructs the story of his great-great grandfather, Constant Lecorgne. A white French Creole, father of five, and working class ship carpenter, Lecorgne had a career in white terror of notable and bloody completeness: massacres, night riding, masked marches, street rampages—all part of a tireless effort that he and other Klansmen made to restore white power when it was threatened by the emancipation of four million enslaved African Americans. To offer a non-white view of the Ku-klux, Ball seeks out descendants of African Americans who were once victimized by "our Klansman" and his comrades, and shares their stories. For whites, to have a Klansman in the family tree is no rare thing: Demographic estimates suggest that fifty percent of whites in the United States have at least one ancestor who belonged to the Ku Klux Klan at some point in its history. That is, one-half of white Americans could write a Klan family memoir, if they wished. In an era when racist ideology and violence are again loose in

the public square, *Life of a Klansman* offers a personal origin story of white supremacy. Ball's family memoir traces the vines that have grown from militant roots in the Old South into the bitter fruit of the present, when whiteness is again a cause that can veer into hate and domestic terror.

Life of a Klansman

A grand narrative of the intertwining lives of Walter Benjamin, Martin Heidegger, Ludwig Wittgenstein, and Ernst Cassirer, major philosophers whose ideas shaped the twentieth century. The year is 1919. The horror of the First World War is still fresh for the protagonists of *Time of the Magicians*, each of whom finds himself at a crucial juncture. Benjamin, whose life is characterized by false starts and unfinished projects, is trying to flee his overbearing father and floundering in his academic career, living hand to mouth as a jobbing critic. Wittgenstein, by contrast, has dramatically decided to divest himself of the monumental fortune he stands to inherit, as a scion of one of the biggest industrial families in Europe, in order to commit himself unswervingly to a life of the mind. Meanwhile, Heidegger, having managed to avoid combat in war by serving instead as a meteorologist, is carefully cultivating his career, aligning himself with the great Edmund Husserl, and renouncing his prior Catholic associations. Finally, Cassirer is working furiously on the margins of academia, applying himself intensely to his writing and the possibility of a career at Hamburg University. The stage is set for a great intellectual drama, which will unfold across the next decade. The lives and ideas of this great philosophical quartet will converge as they become world historical figures. But as the Second World War looms on the horizon, their fates will be very different. Wolfram Eilenberger, internationally bestselling author, stylishly traces the paths of these remarkable and turbulent lives, which feature not only philosophy but some of the most important economists, politicians, journalists, and
