This is a faithful reproduction of the Floyd Clymer publication of the same title originally published in 1959. Written in a style that removes the mystique from performance tuning, much of the technical jargon is replaced with easy to read language and, to the credit of the author, he gets the message across without the need for the reader to possess a degree in mechanical engineering. A straightforward common sense approach to the subject of improving a VWs performance and while many of the manufacturers of the performance items referenced within may no longer be in business and prices have changed considerably since 1959, many new suppliers have come forward with alternate performance products. In addition, many of the vintage parts routinely turn up at swap meets and can also be obtained through a variety of vintage performance parts suppliers. Therefore, while some of resources may have changed since 1959 the information is still applicable and should assist in providing the reader with appropriate data to aid in the selection of the newer performance products currently available. This how-to manual also includes complete technical data, tune-up information, fault finding charts and a detailed list of construction changes that took place between the years 1957 and 1959. Out-of-print and unavailable for many years, this book is becoming increasingly more difficult to find on the secondary market and we are pleased to be able to offer this reproduction as a service to all VW enthusiasts worldwide.

Volkswagen Rabbit, Scirocco Service Manual, 1975/1976/1977/1978/1979 Gasoline Models

As with most postwar British sports cars, a large portion of the Triumphs produced in the 1950s and 1960s were exported to the United States. As a result, the demands of U.S. customers essentially defined what a Triumph sports car would be. This automotive history tells the colorful tale of Triumph's successes in the United States, how the marque was established, its dealer network, promotional and marketing efforts, racing ventures that starred legendary drivers like Stirling Moss and Bob Tullius, profiles of U.S.-exclusive models, and, finally, Triumph's sad defeat under the umbrella of British Leyland. A huge collection of black-and-white photography, much of it archival and not seen in print for decades, imparts a sense of this British marque's jolly good run in the United States.

The 8.8cm Flugzeugabwehrkanone 18/36/37/41 - more popularly known as the 'Flak 88' - was one of the most successful and influential artillery gun types in the German arsenal in the Second World War. Developed during the 1920s and 1930s, the gun combined accuracy, a high muzzle velocity and a rapid rate of fire (15-20rpm). Although at first developed as an anti-aircraft gun, it went on to achieve equal repute as an anti-tank weapon, imposing horrific casualties on Allied armor across all major European and North African theaters of war. In one clash in Normandy, in June 1944, for example, a single Luftwaffe 8.8cm battery destroyed some 40 Allied tanks.

MGA Restoration Guide

The Spitfire remains one of the most iconic combat aircrafts of all time and to own an airworthy example of this classic fighter is the Holy Grail for many wealthy Warbird collectors. For an aircraft that first flew more than 70 years ago and which went out of production in the early 1950s, it may seem odd to discover that there is a flourishing industry centered on this aircraft in the 21st century. Scratch-building brand new Spitfires or restoring original examples to airworthy condition has become big business, with aircrafts changing hands for several million dollars apiece. Husband and wife author team Paul and Louise Blackah look into what is required to find a Spitfire that's suitable for restoration and then return it to the skies. With Paul's vast experience in restoring and maintaining the RAF BBMF's Spitfires, and both Paul and Louise's contacts in the aircraft restoration community, this promises to be a unique look inside the world of Spitfire building and restoration in the 21st century.
