There are hundreds--if not thousands--of techniques used to compromise both Windows and Unix-based systems. Malicious code and new exploit scripts are released on a daily basis, and each evolution becomes more and more sophisticated. Keeping up with the myriad of systems used by hackers in the wild is a formidable task, and scrambling to patch each potential vulnerability or

address each new attack one-by-one is a bit like emptying the Atlantic with paper cup. If you're a network administrator, the pressure is on you to defend your systems from attack. But short of devoting your life to becoming a security expert, what can you do to ensure the safety of your mission critical systems? Where do you start? Using the steps laid out by professional security analysts and consultants to identify and assess risks, Network Security Assessment offers an efficient testing model that an administrator can adopt, refine, and reuse to create proactive defensive strategies to protect their systems from the threats that are out there, as well as those still being developed. This thorough and insightful guide covers offensive technologies by grouping and analyzing them at a higher level--from both an offensive and defensive standpoint--helping administrators design and deploy networks that are immune to offensive exploits, tools, and scripts. Network administrators who need to develop and implement a security assessment program will find everything they're looking for--a proven, expert-tested methodology on which to base their own comprehensive program--in this time-saving new book.

PLUS I give you lists to make it easy to follow. Have ACTIVE Cancer? Doctors say your Chances are LOW? Scared to DEATH? I show you what kind & how FASTING prior to your CHEMO can increase your odds of COMPLETE REMISSION plus reduce your chemo side effects. For Early Stage (or ANY Stage) Cancers I show you how to DRAMATICALLY reduce your chance for METASTASES -- a CRITICAL THING! Cancer cells have roughly 8X the metabolic needs of regular cells -- I show you research to use this against those bad cells! Did you know there's a cheap easy-to-take medication that any doctor can prescribe that INCREASES your chance of COMPLETE REMISSION by 50% or more? I show you a great (but all natural) prescription medicine you can get to increase your odds for COMPLETE REMISSION by 5 FOLD!! (Plus get rid of miserable symptoms caused by some of the therapies you're going through)! What's a Stage 4 Breast Cancer Diagnosis Chance of Survival? 15% UGH! But do what the literature actually suggests? How high can you go? Whether you have a Stage 1 or Stage 4 BREAST CANCER, you are in for a FIGHT for YOUR LIFE, and you need to do EVERYTHING your doctor tells you to do -- from CHEMO to SURGERY. But what if I can show you how to do what your doctor says but to do it a little differently, to tweak things a little to massively improve your odds of winning against this beast? And really-- does your doctor know everything? I don't. And I've

been practicing medicine for 30 years. I've even written a textbook on Preventive Medicine (my Program120 book) and 11 other books (yes, and some have been bestsellers on Amazon) but I wrote this book FOR YOU and FOR YOUR DOCTORS -- all these studies are peer reviewed, solid and major trials -- nothing small. Your surgeons and doctors just don't have the time to look all of this up and to sit and chat with you for hours about all of this. So I put it into a book (and an online course too you can view but that's for another time and place) -- I've thrown it out there -- and I do not take this lightly or I could be sued into oblivion.
