American Philosophy

Self-Knowledge introduces philosophical ideas about knowledge and the self. The book takes the form of a personal meditation: it is one person's attempt to reflect philosophically upon vital aspects of his existence. It shows how profound philosophy can

swiftly emerge from intense private reflection upon the details of one's life and, thus, will help the reader take the first steps toward philosophical self-understanding. Along the way, readers will encounter moments of puzzlement, then clarity, followed by more perplexity and further insights, and then—finally—some philosophical peace of mind.

This work, originally published in 1912, is an introduction to the theory of philosophical enquiry. It gives Russell's views on such subjects as the distinction between appearance and reality and the existence and nature of matter.

The Oxford Handbook of Philosophy and Race

Why should modern psychotherapists be interested in philosophy, especially ancient philosophy? Why should philosophers be interested in psychotherapy? There is a sense of mutual attraction between what are today two thoroughly distinct disciplines. However, arguably it was not always the case that they were distinct. The author takes the view that by reconsidering the generally received wisdom concerning the history of these closely-related subjects, we can learn a great deal about both philosophy and psychotherapy, under which heading he includes potentially solitary pursuits such as "self-help" and "personal development".

I Think, Therefore I Draw

To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, *The Power of Now* is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better.

The World of Philosophy

The name of Eucken has become a familiar one in philosophical and religious circles. Until recent years the reading of his books was confined to those possessing a knowledge of German, but of late several have been translated into the English language, and now the students of philosophy and religion are agog with accounts of a new philosopher who is at once a great ethical teacher and an optimistic prophet. There is no doubt that Eucken has a great message, and those who cannot find time to make a thorough study of his works should not fail to know something of the man and his teachings. The

aim of this volume is to give a brief and clear account of his philosophical ideas, and to inspire the reader to study for himself Eucken's great works.

Self-Knowledge

This topically-organized hybrid text/reader helps students understand, appreciate, and even do philosophy. Reinforcing philosophical writings with step-by-step coaching in how to write argumentative essays, and supported by opportunities to hone critical thinking, this text demonstrates how philosophy applies to everyday life.

A Little Book for New Philosophers

What's the point of studying philosophy when we have theology? Philosophy sometimes suffers from an inferiority complex in the church. But Paul Copan contends that it is possible to affirm theology's preeminence without diminishing the contribution of philosophy. This brief introduction surveys philosophy's basic aims and defends its function in the Christian life.

The Philosophy of Cognitive-Behavioural Therapy (CBT)

Introducing Philosophy

Where are the women philosophers? The answer is right here. The history of philosophy has not done women justice: you've probably heard the names Plato, Kant, Nietzsche and Locke - but what about Hypatia, Arendt, Oluwole and Young? The *Philosopher Queens* is a long-awaited book about the lives and works of women in philosophy by women in philosophy. This collection brings to centre stage twenty prominent women whose ideas have had a profound - but for the most part uncredited - impact on the world. You'll learn about Ban Zhao, the first woman historian in ancient Chinese history; Angela Davis, perhaps the most iconic symbol of the American Black Power Movement; Azizah Y. al-Hibri, known for examining the intersection of Islamic law and gender equality; and many more. For anyone who has wondered where the women philosophers are, or anyone curious about the history of ideas - it's time to meet the philosopher queens.

Be Here Now

The celebrated civil rights leader outlines the trends in the African American struggle during the sixties, and pleads for peaceful coexistence between the African American and white communities.

Moral Issues in Business

The *Das Kapital* of the 20th century, *Society of the Spectacle* is an essential text, and the main theoretical work of the Situationists. Few works of political and cultural theory have been as enduringly

provocative. From its publication amid the social upheavals of the 1960's, in particular the May 1968 uprisings in France, up to the present day, with global capitalism seemingly staggering around in it's Zombie end-phase, the volatile theses of this book have decisively transformed debates on the shape of modernity, capitalism, and everyday life in the late 20th century. This 'Red and Black' translation from 1977 is Introduced by Notting Hill armchair insurrectionary Tom Vague with a galloping time line and pop-situ verve, and given a more analytical over view by young upstart thinker Sam Cooper.

How to Think about Weird Things

Living Philosophy

"Introducing Philosophy : A Text with Integrated Readings is a topically organized hybrid textbook, introducing core philosophical problems and the many ways they are, and have been, answered. The authors combine substantial selections from significant works in the history of philosophy with excerpts from current philosophy, clarifying the readings and providing context with their own detailed commentary and explanation. Spanning 2,500 years, the selections range from the oldest known fragments to cutting-edge contemporary essays. The chapters present alternative perspectives-including analytic, continental, feminist, and non-Western viewpoints-alongside the historical works of major Western philosophers; this juxtaposition encourages students to carefully evaluate the theories themselves"--

The Confessions of St. Augustine

In 1688 the Irish scientist and politician William Molyneux sent a letter to the philosopher John Locke. In it, he asked him a question: could someone who was born blind, and able to distinguish a globe and a cube by touch, be able to immediately distinguish and name these shapes by sight if given the ability to see? The philosophical puzzle offered in Molyneux's letter fascinated not only Locke, but major thinkers such as Leibniz, Berkeley, Diderot, Reid, and numerous others including psychologists and cognitive scientists today. Does such a question represent a philosophical puzzle or a problem that can be solved by experimental tests? Can vision be fully restored after blindness? What is the relation between vision and touch? Are the senses linked through learning or bound at birth? Molyneux's Question and the History of Philosophy is a major collection of essays that explore the long-standing issues Molyneux's problem presents to philosophy of mind, perception and the senses. In addition, the volume considers the question from an interdisciplinary angle, examines the pre-history of the question, and aspects of it that have been ignored, such as perspectives from religion and disability. As such, Molyneux's Question and the History of Philosophy presents a set of philosophically

rich, empirically informed, and scientifically rigorous original investigations into this famous puzzle. It will be of great interest to students and researchers in philosophy, psychology, and the cognitive sciences including neuroscience, neurobiology and ophthalmology, as well as those studying the mind, perception and the senses.

The Voyage of Discovery

An inspired gathering of religious writings that reveals the "divine reality" common to all faiths, collected by Aldous Huxley "The Perennial Philosophy," Aldous Huxley writes, "may be found among the traditional lore of peoples in every region of the world, and in its fully developed forms it has a place in every one of the higher religions." With great wit and stunning intellect—drawing on a diverse array of faiths, including Zen Buddhism, Hinduism, Taoism, Christian mysticism, and Islam—Huxley examines the spiritual beliefs of various religious traditions and explains how they are united by a common human yearning to experience the divine. The Perennial Philosophy includes selections from Meister Eckhart, Rumi, and Lao Tzu, as well as the Bhagavad Gita, Tibetan Book of the Dead, Diamond Sutra, and Upanishads, among many others.

Jonathan Livingston Seagull

Highly praised by reviewers for its clarity and rich exposition, this history of philosophy text illustrates philosophy as a process and not just a collection of opinions or conclusions. Rather than simply giving a reporting the results of a given philosopher, Lawhead's prose assists students in retracing the thinker's intellectual journey that first gave rise to the ideas for which they are remembered. In effect, the particular philosopher's deliberations become a puzzle which students are invited to take up themselves. Lawhead uses metaphors, analogies, vivid images, concrete examples, common experiences, and diagrams to bring the abstract issues down to earth and show the unavoidable practical implications and contemporary relevance of positions.

Mansourou comes out of the gate firing and does not relent in this criticism of religious notions and influence. Rather than refer to religion in general terms or acts in the name of religion, Mansourou attacks religious undertones and what is not often looked at in religious subtext along with modern religious theology for their shallow and vacant themes in today's complex society.

Rudolf Eucken

Bestselling author and acclaimed physicist Lawrence Krauss offers a paradigm-shifting view of how everything that exists came to be in the first place. “Where did the universe come from? What was there before it? What will the future bring? And finally, why is there something rather than nothing?” One of the few prominent scientists today to have crossed the chasm between science and popular culture, Krauss describes the staggeringly beautiful experimental observations and mind-bending new theories that demonstrate not only can something arise from nothing, something will always arise from nothing. With a new preface about the significance of the discovery of the Higgs particle, *A Universe from Nothing* uses Krauss’s characteristic wry humor and wonderfully clear explanations to take us back to the beginning of the beginning, presenting the most recent evidence for how our universe evolved—and the implications for how it’s going to end. Provocative, challenging, and delightfully readable, this is a game-changing look at the most basic underpinning of existence and a powerful antidote to outmoded philosophical, religious, and scientific thinking.

Cengage Advantage Books: Bioethics in a Cultural Context: Philosophy, Religion, History, Politics

The notion of 'the human' is in need of urgent redefinition. At a time of radical bio-technological developments, and in light of the political and environmental imperatives of our age, the term 'posthuman' provides an alternative. The

philosophical landscape which has developed as a response to the crisis of the human, includes several movements, such as: Posthumanism, Transhumanism, Antihumanism and Object Oriented Ontology. This book explains the similarities and differences between these currents and offers a detailed examination of a number of topics that fall under the “posthuman” umbrella, including the anthropocene, artificial intelligence and the deconstruction of the human. Francesca Ferrando affords particular focus to Philosophical Posthumanism, defined as a philosophy of mediation which addresses the meaning of humanity not in separation, but in relation to technology and ecology. The posthuman shift thus emerges in the global call for social change, responsible science and multispecies coexistence.

Philosophy Here and Now

The epic wisdom contained in a lost library helps the author turn his life around John Kaag is a dispirited young philosopher at sea in his marriage and his career when he stumbles upon West Wind, a ruin of an estate in the hinterlands of New Hampshire that belonged to the eminent Harvard philosopher William Ernest Hocking. Hocking was one of the last true

giants of American philosophy and a direct intellectual descendent of William James, the father of American philosophy and psychology, with whom Kaag feels a deep kinship. It is James's question "Is life worth living?" that guides this remarkable book. The books Kaag discovers in the Hocking library are crawling with insects and full of mold. But he resolves to restore them, as he immediately recognizes their importance. Not only does the library at West Wind contain handwritten notes from Whitman and inscriptions from Frost, but there are startlingly rare first editions of Hobbes, Descartes, and Kant. As Kaag begins to catalog and read through these priceless volumes, he embarks on a thrilling journey that leads him to the life-affirming tenets of American philosophy—self-reliance, pragmatism, and transcendence—and to a brilliant young Kantian who joins him in the restoration of the Hocking books. Part intellectual history, part memoir, *American Philosophy* is ultimately about love, freedom, and the role that wisdom can play in turning one's life around.
