Improving Literacy at KS2 and KS3 is all about primary-secondary transfer, seen mostly through the eyes of secondary teachers, but with some interesting contributions from middle-school staff who know the territory well. This book sees the NLS's influence on primary practice as generally benign, but takes a more jaundiced view of the implications for secondary teaching, especially in its central chapter "Evidence from experienced practitioners". There are, however, many useful suggestions for reshaping and adapting parts of the strategy, including chapters on classroom literacy and everyday life and literacy and drama which

consider ways of relating learning to the wider culture beyond school, including screen-based literacy. There is also a review of the language-across-the-curriculum movement and a chapter on subject literacies which has left me with an abiding admiration for geography teachers as lone voices of dissent' - Sue Palmer, TES Teacher This book will help students and practising teachers to understand the issues surrounding literacy, the place of transition in pupils' lives, and to feel confident in handling The National Literacy Strategy. The book focuses on the crucial period when children complete primary schooling and begin in secondary schools. It examines the issue of transition from one phase to the other and specifically, the nature of literacy at this period. The authors contrast the 'whole school' approach of primaries to the very subject-specific nature of secondary teaching. The authors set the NLS in perspective, reviewing earlier movements such as Language across the Curriculum and the NLS itself. They offer a critique of the strategy and outline its strengths and weaknesses. The book sets out evidence of the way schools are reacting to the NLS, and what classroom teachers and their pupils think. Its coverage is comprehensive and includes focus on primary, secondary and middle schools, the teaching of literacy and English, the role of ICT, as well as important areas such as media education, drama and modern foreign languages. This book will be useful to education students and to practicing teachers in primary and secondary schools.

We the Kids

Preparing students to be active, informed, literate citizens is one of the primary functions of public schools. But how can students become engaged citizens if they can't read, let alone understand, their social studies texts? What can educators--and social studies teachers in particular--do to help students develop the knowledge, skills, and motivation to become engaged in civic life? Building Literacy in Social Studies addresses this question by presenting both the underlying concepts and the research-based techniques that teachers can use to engage students and build the skills they need to become successful readers, critical thinkers, and active citizens. The authors provide targeted strategies--including teaching models, graphic organizers, and step-by-step instructions--for activities such as * Building vocabulary, * Developing textbook literacy skills, * Interpreting primary and secondary sources, * Applying critical thinking skills to newspapers and magazines, and * Evaluating Internet sources. Readers will also learn how to organize classrooms into models of democracy by creating learning communities that support literacy instruction, distribute authority, encourage cooperation, and increase accountability among students. Realistic scenarios depict a typical social studies teacher's experience before and after implementing the strategies in the classroom, showing their potential to make a significant difference in how students respond to instruction. By making literacy strategies a vital part of content-area instruction, teachers not only help students better understand their schoolwork but also open students' eyes to the power that informed and engaged people have to change the world.
