Most textbooks on abnormal psychology include short descriptions of actual clinical cases. However, those presentations are necessarily brief and too fragmented for students to gain a clear understanding of the unique complexities of a person's troubled life. Case Studies in Abnormal Psychology, Ninth Edition takes mental disorders from the realm of theory into the complex reality of human lives. This casebook presents comprehensive coverage of 23 high interest cases that include topics such as eating disorders, gender identity disorder, borderline personality,

and posttraumatic stress disorder. Each study (1) provides detailed descriptions of a range of clinical problems, (2) illustrates some of the ways in which these problems can be viewed and treated, and (3) discusses some of the evidence that is available concerning the prevalence and causes of the disorders in question.

From the reviews of the seventh edition: "Collectively, they have once again produced an excellent text that manages to cover the broad scope of emergency medicine while remaining an easily readable and practical resource. Last, for the inevitable comparison of this current edition of Tintinalli's Emergency Medicine with other available emergency medicine textbooks available: in my opinion, Tintinalli's still comes out on top. It is more concise and easier to read than some, yet it covers the breadth of emergency medicine practice more comprehensively than others. Just as previous editions did, the seventh presents all of the most pertinent and up-to-date information in a well-organized format that is comprehensive yet easy to read. That and many of the attractive new features in this current edition will ensure its place on my bookshelf for years to come."—JAMA
