This is a second edition of Lang's well-known textbook. It covers all of the basic material of classical algebraic number theory, giving the student the background necessary for the study of further topics in algebraic number theory, such as cyclotomic fields, or modular forms. "Lang's books are always of great value for the graduate student and the research mathematician. This updated edition of Algebraic number theory is no exception."—MATHEMATICAL REVIEWS

### **Simplicity's Simply the Best Sewing Book**

Pucker or Puckering is the most used (abused?) term in the garment manufacturing industry. Pick up any quality controllers report, and the first thing that will strike your eye will be "...Puckering in armhole, ...Puckering in neckline binding, ...control Puckering in bottom hem..." the list is endless. Buying office quality controllers are as enamoured of this term as much as manufacturers abhor it. What is it that makes it so distasteful? Why does it occur? How can it be controlled? While there are numerous leaflets, documents and articles available on pucker, we have found that the majority of them lay great stress on "inherent pucker" (only material parameters). In this booklet have tried to include process parameters as well as sewing of lightweight fabrics. All said and done, the problem is so intricately interdependent that exhaustive compilation is well nigh impossible. We are sure this booklet will help manufacturers to understand the rationale behind this publication and we will consider our effort successful if enthusiastic readers regularly inform us about newer methods to tackle the problem.

Professor Lou Marinoff's first book drew on the wisdom of the great philosophers to solve our everyday problems, launching a movement that restored philosophy to what it once was: useful in all walks of life. Now, in *The Big Questions*, he takes the concept to the next level, applying centuries of philosophy and great literature to answer central questions of modern existence. Urging us not to accept victimhood as the by-product of modern life, Professor Marinoff uses specific case studies from his counseling practice to show how wisdom from the great thinkers can help us define our own philosophy, and thereby reclaim our sense of well-being. He asks and answers questions that go to the heart of the human condition: How do we know what is right? How can we cope with change? Why can't we all get along? And, most centrally, how can we use the centuries of wisdom that have come before us to help us answer these questions and feel at ease in the world? Accessible, entertaining, and profoundly useful, *The Big Questions* mixes wisdom from the great thinkers with specific case studies to illuminate how a shift in perspective can truly be life changing. Lou Marinoff is the author of the international hit *Plato, Not Prozac!*, which has been published in twenty languages. A professor of philosophy at the City College of New York, Marinoff is also the founding president of the American Philosophical Practitioners Association. Praise for *Plato, Not Prozac*: 'What exactly is philosophical practice? Marinoff calls it 'therapy for the sane.' In a nutshell, it's using the 2,500-year-old tradition of philosophy to solve everyday problems, like work, relationship and family issues. It's a return to what philosophy was meant to be - a guideline for a way of

life.'-Salon.Com 'Plato, Not Prozac! looks to become the bible of the "philosophical counseling" movement.' -Philadelphia Inquirer Magazine 'The ancient think

In one volume this book provides useful and innovative protocols developed specifically for the proteomic profiling of human tissues. The book provides high-throughput gel-based techniques, microarrays and a number of other methods used in proteomic research. This important book will prove indispensable to investigators of biomarker discovery and therapeutic response profiling, as well as those forging new paths in the fields of theranostics and personalized medicine.

## **Starting Missional Churches**

### **The Twelve Years Truce (1609)**

All mission is local the people of God joining the work of God in a particular place. In Starting Missional Churches Mark Lau Branson and Nicholas Warnes introduce us to seven missional churches while examining common challenges regarding their genesis. Using stories, interviews with pastors and a look at common preconceived

notions of church planting in the West, this guide brings together resources of the missional church conversation with the creativity and energy of those who are experimenting with diverse planting activities and practices across the country. Curated by a pastor and a professor, this work highlights diverse modern examples of congregations focused on reaching their communities with a missional mindset. Learn from these stories how to build a vibrant, engaging church—one that generates redemptive witness in our neighborhoods and in our world.
