### The Early History of Surgery

Based loosely on the life of Princess Pari Khan Khanoom, *Equal of the Sun* is a riveting story of political intrigue and a moving portrait of the unlikely bond between a princess and a eunuch. Iran in 1576 is a place of wealth and dazzling beauty. But when the Shah dies without having named an heir, the court is thrown into tumult. Princess Pari, the Shah's daughter and protégée, knows more about the inner workings of the state than almost anyone, but her maneuvers to instill order after her father's sudden death incite resentment and dissent. Pari and her closest adviser, Javaher, a eunuch able to navigate the harem as well as the world beyond the palace walls, possess an incredible tapestry of secrets that explode in a power struggle of epic proportions. Legendary women—from Anne Boleyn to Queen Elizabeth I to Mary, Queen of Scots—changed the course of history in the royal courts of sixteenth-century England. They are celebrated in history books and novels, but few people know of the powerful women in the Muslim world, who formed alliances, served as key advisers to rulers, lobbied for power on behalf of their sons, and ruled in their own right. In *Equal of the Sun*, Anita Amirrezvani's gorgeously crafted tale of power, loyalty, and love in the royal court of Iran, she brings one such woman to life,

I marched with the Eight Army An excerpt from comments made by Winston Churchill at Tripoli on 5 Feb, 1943. I must tell you that your fame, the fame of the desert army, has spread throughout the world. After Tobruk surrendered there were very dark hours, and many people who do not know about us were ready to take a discouraging view. But the events you have achieved have put the British Army on the map and won the admiration of all the troops now engage against the common enemy. When I was in Casablanca with the President of the United States, it was the arrival of the desert army on Tripoli and the Fact that it had come into play as a great new factor the more than anything else influenced the course of our discussions and opened up hopeful prospects for the future. Your are entitled to dwell on this fact with that satisfaction which men can feel in their hearts when great work has been finally done. You have rendered great services to your country and to the common cause. It must have been a tremendous experience, driving them further say after day over this dessert which it has taken me six and a half hours to fly across. And the lines come to me of a hymn

### **Soldier's Heart**

In gripping prose, one of the world's leading cardiac surgeons lays bare both the wonder and the horror of a life spent a heartbeat away from death. When Stephen Westaby witnessed a patient die on the table during open-heart surgery for the first time, he was struck by the quiet, determined way the surgeons walked away. As he soon understood, this detachment is a crucial survival strategy in a profession where death is only a heartbeat away. In *Open Heart*, Westaby reflects on over 11,000 surgeries, showing us why the procedures have never become routine and will never be. With astonishing compassion, he recounts harrowing and sometimes hopeful stories from his operating room: we meet a pulseless man who lives with an electric heart pump, an expecting mother who refuses surgery unless the doctors let her pregnancy reach full term, and a baby who gets a heart transplant—only to die once it's in place. For readers of Atul Gawande's *Being Mortal* and of Henry Marsh's *Do No Harm*, *Open Heart* offers a soul-baring account of a life spent in constant confrontation with death.

### **The Nutmeg of Consolation (Vol. Book 14) (Aubrey/Maturin Novels)**

This book, the first full-length cross-period comparison of medieval and modern literature, offers cutting edge research into the textual and cultural legacy of the Middle Ages: a significant and growing area of scholarship. At the juncture of literary, cultural and gender studies, and capitalizing on a renewed interest in popular western representations of the Islamic east, this book proffers innovative case studies on representations of cross-religious and cross-cultural romantic relationships in a selection of late medieval and twenty-first century Orientalist popular romances. Comparing the tropes, characterization and settings of these literary phenomena, and focusing on gender, religion, and ethnicity, the study exposes the historical roots of current romance representations of the east, advancing research in Orientalism, (neo)medievalism and medieval cultural studies. Fundamentally, *Representing Difference* invites a closer look at medieval and modern popular attitudes towards the east, as represented in romance, and the kinds of solutions proposed for its apparent problems.

### **The Sheikh and the Surrogate Mum**

## **The Academy and Literature**

Excerpt from The Surgeon's Log: Being Impressions of the Far East It is almost eighteen months since the impressions here recorded first were offered to the public; and re-reading them now, after the interval, I am conscious that for me the first glad joy of it is over, I can never again recapture the shimmering golden glamour of it all. Indeed, looking back through the grey mist of England, I find myself tempted, with the wisdom or folly of later remembrance, to revise, rewrite, tone down some of the pictures that now seem too polychromatic in the retrospect. But I have refrained, feeling that thereby any value they may possess as truth would be mirror dimmed by the breathings of the later mood - their individuality would thus be lost. Nevertheless, I have yielded to temptation to this extent: so' many have written asking What became of them afterwards? That I have added a postscript to the original narrative telling what they thought of it all, and how they liked being put into a book. Nothing had pleased me more than the numerous letters I have received from doctors - young men writing eagerly to know if I could find them such a ship in which they might have such experiences, older men enquiring furtively, apologetically, if their grey hairs could possibly be overlooked so that they too might find themselves amid similar surroundings. Apparently romance dies hard, and so to all I have replied that, given the proper subjective attitude of mind, their pleasure under similar circumstances would be as great - for it is in ourselves, not in the events that occur to us that

With the stakes this high, Nina calls in private investigator Paul Van Wagoner, her ex-lover and constant ally, whose bravado conceals a troubling personal secret. As Paul investigates the eerily coincidental death of the surgeon's son--killed in a plane crash the same night his father was murdered--Nina sorts through the twisting lies surrounding Nikki, uncovering a bitter struggle over a mining claim, enraged former patients, and two old crimes. Finally, Nina must confront the central question she needs to answer in order to save her client: What did Nikki really see the night of her uncle's murder? Taut, thought-provoking, and utterly gripping, *Move to Strike* grapples with the profound question of what to do when the law does not suffice. Area 51 It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government-but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base.

Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In Area 51, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, Area 51 weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.
